Signals to be shown by vessels aground in the channels.

THE British Admiralty has given notice (No. 193 of 1895) that the undermentioned signals are to be shown from vessels grounding, and thereby obstructing the navigation in the South, West, or Hopetoun channels, port Phillip:—

By day:—Two balls or shapes, placed vertically 6 feet apart.

By night:—In addition to the ordinary lights, *two red* lights, placed vertically 6 feet apart in globular lanterns of not less than 8 inches in diameter, and in such a position with respect to the ordinary *white* light as to indicate, as nearly as possible, the position and extent of the obstruction.

Also to station a lookout, on board or in a boat, to give warning to approaching vessels.

Shoal S. S. W. of Halfway island.

The British Admiralty has given notice (No. 195 of 1895) that the steam vessel *Duke of Buckingham* recently touched on a shoal patch, situated near the track recommended, about 3½ miles S.S.W. (S. 22° W.) from Halfway island, or approximately in lat. 11° 26′ S.; long. 142° 56′ E.

It is probable that this is the shoal reported by Captain Pearn in 1876 about one mile north-east of this position, and which has hitherto been searched for in vain, but which still remains on the Admiralty chart.

RESOLUTION ON THE CHEMICAL EXAMINER'S REPORT FOR 1894.

MUNICIPAL DEPARTMENT,—MEDICAL.

Darjeeling, the 7th May 1895.

RESOLUTION—No. 24T.—M.

READ—

A letter from the Inspector-General of Civil Hospitals, Bengal, No. 2198, dated the 9th March 1895, forwarding the report of the Chemical Examiner to Government for the year 1894.

Read also—

The report for 1893 and the Resolution recorded on it.

The number of analyses performed during the year was 2,940 against 3,462 in 1893 and 3,403 in 1892. There was a decrease of 522 cases in the number of analyses performed during the year as compared with 1893, and of 463 cases as compared with 1892. The decrease occurred chiefly in substances other than animal tissue suspected to be or to contain poison, including cattle-poison, in articles tested for blood stains, and in petroleum and inflammable oils. In addition to his analytical work, the Chemical Examiner had to report on nine technical questions and eleven applications for leave to file specifications for patent processes.

2. The total number of medico-legal cases referred to the Chemical Examiner during the year was 787, the number of articles sent for examination in connection with them being 1,451 or 170 less than in the previous year. The decrease was mainly in substances tested for poison and articles tested for blood stains. Two hundred and ninety human viscera were examined for

poison against two hundred and sixty-nine in the previous year, and in 45·86 per cent. of these cases poison was found against 45·95 in 1893 and 45·65 in 1892. Opium was, as usual, the most common form of poison, and was found in 21·55 per cent. of the cases, against 26·10 in the year before. The other principal poisons detected were arsenic, morphia and aconite. In 157 out of 290 human viscera, and in 312 other cases of suspected substances out of 758 sent up for analysis, no poison was found. The number of suspected cattle-poisoning cases in which animal viscera were sent up for examination was 154, the same number as in the previous year, and in these arsenic was discovered in 74·67 per cent. against 74·02 in 1893.

3. The number of articles tested for purity and quality was 1,489 against 1,841 in the previous year. The decrease was mainly under the head of petroleum, alcoholic spirit, and explosives sent for analysis. In consequence of the orders issued in 1894, under which Chairmen of Municipalities and District Officers have been authorised to send water for analysis to Mr. Norman Rudolf, who has established a Chemical Laboratory at Siwan in the district of Saran, the Chemical Examiner has been relieved of a good deal of his work in this direction. Before these orders were received, however, 197 samples of potable water had been examined. Of these 15 were sent up by municipalities, 105 were from Jails, and 77 from other Departments.

4. The results of the analysis of 192 samples of potable water examined during the year are set forth in Appendix A to the Chemical Examiner's report. The samples are arranged in the following classes:—

Class.	Number of samples.
Good	28
Fair	83
Indifferent	34
Bad	47

In commenting on this classification the Chemical Examiner observes that hardly any of the waters are up to the European standard of purity, ammonia, both free and albuminoid, and nitrogen being present in larger quantities than would be regarded by sanitary authorities in Europe as admissible in good drinking water. The Lieutenant-Governor has found a difficulty in making out what relation the figures in the different columns of the statement bear to the conclusions arrived at regarding the comparative purity of the different classes of water. It is understood, however, from an unofficial reference to Dr. Evans, that the classification adopted by him is based upon the practice of English analytical chemists, who look to the probable combined effect of all the component elements of water, and reject as misleading what is known as Wigner's system, which assigns a numerical value to the various chemical factors in accordance with an arbitrary scale of marks.

5. Important researches were made by the Chemical Examiner during the year into the physiological properties of hemp drugs, samples of which were sent to him for examination by the Hemp Drugs Commission, and into the effect of different modes of packing ganja upon the quality of the drug. The latter inquiry was undertaken at the instance of the Board of Revenue, who supplied the samples for analysis, and on the results obtained the Chemical Examiner has based the opinion that although a considerable chemical change takes place in ganja when kept, this change is not influenced by the mode of packing adopted.

The acknowledgments of the Lieutenant-Governor are due to Dr. Evans for his interesting report and for the good work done by him during the year. His Honour notices with satisfaction the remarks of commendation passed by Dr. Evans on the laboratory staff. During the year the Assistant Chemical Examiner, Rai Tara Prasanna Rai Bahadur, retired from the service, after spending 23 years in the Chemical Department. The Lieutenant-Governor takes this opportunity of placing on record his sense of the valuable services rendered to Government by this officer.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

SALE OF QUININE IN PICE PACKETS IN BENGAL.

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 7th May 1895.

RESOLUTION—No. 31T.—M.

READ—

A report, dated 1st December 1894, by the Inspector-General of Civil Hospitals, on the sale of quinine by Subordinate Medical Officers.

Statements furnished by the Inspector-General of Jails showing the quantity of quinine supplied to Post Offices and Civil Surgeons from the beginning of the operations in November 1892 to the 30th September 1894.

Read again—

Resolution by the Government of Bengal, Municipal Department, No. 3263, dated the 6th December 1892, regarding the extension of the sale of quinine among the poorer classes in Bengal.

IN the Resolution of the 6th December 1892, the Lieutenant-Governor reviewed the history of various attempts which had been made to popularise the use of quinine and to extend its sale among the poorer classes in the interior of Bengal, indicated the causes of their failure, and put forward a new scheme which seemed likely to have greater prospects of success. This scheme proposed to create a demand for pure quinine among the poor by selling it in small quantities at a large number of centres for the smallest coin in common use, and by giving the sellers an interest in pushing the sales. It was arranged to supply the quinine from the Government Factory at Darjeeling, and to make it up by jail labour into packets containing five grains each and bearing a Government stamp as a guarantee of its purity. The price of each packet was fixed at one pice.

2. It was intended that these packets should eventually be offered for sale at all public offices in the interior of districts, such as police-stations and outposts, dispensaries, pounds and post-offices; but as a first step, with the permission of the Government of India, the experiment was commenced through the agency of the Postal Department at all offices except those in large towns where it was then believed that even the poorer classes had other means of procuring pure quinine. Every post-master in charge of a branch office or sub-post-office was supplied through the post, by the Superintendent of Jail Manufactures, Calcutta, with one or more parcels of 102 packets holding 5 grains of quinine apiece. Each parcel being worth, at a pice per packet, Re. 1-9-6; the value of six packets, or an anna and-a-half, was retained as commission by the vendor, and Re. 1-8 was repaid to Government. The value of the first consignment of parcels was treated as a permanent advance; but when further supplies were required they were paid for by money-order, the commission on which was borne by the Jail Department. The five-grain packets were sold at one pice each, and the value of them accounted for by the post-masters.

3. Proceedings commenced in the Bengal Postal Circle, and as soon as the scheme was found to be working well, the other two circles, Eastern Bengal and Bihar, were simultaneously supplied with quinine. The most fever-stricken districts were taken up first, and by the end of November 1892, 34,986 pice packets had been supplied to the nine districts noted in the margin. Within the following month 160,854 packets were sent out to all districts except those of Bihar and Chota Nagpur, and during January 1893 201,144 packets were distributed, thus completing the initial supply for the whole Province. During the next seven months supplies were sent to Civil Surgeons for sale in the mufassal through dispensaries, the vaccination establishment or otherwise. The East Indian Railway Company was also allowed to co-operate in the scheme, their station-masters at small road-side stations being permitted to sell quinine in the same manner as post-masters; and lastly, all private employers of labour, zamindars and indigo and tea planters who might desire to take advantage of this method of distributing quinine, were invited to apply to the Superintendent of Jail Manufactures.

4. As the experiment was started during the months when fever is least prevalent in Bengal, and also owing to its novelty, comparatively slow progress was made in the earlier stages. The remittances made on account of the price of quinine sold from November 1892 to the end of March 1893 amounted to Rs. 844-0-6, representing 57,390 pice packets actually sold, or an average of 11,478 per month. Ampler statistics have since been furnished covering the period from November 1892 to the end of September 1894, and these will not be examined with reference to the general progress of the scheme and the comparative efficiency of the two agencies engaged in selling quinine—the post-offices and the Civil Surgeons Statements A and B annexed to this Resolution show the supplies to, and sales by, Civil Surgeons and post-offices respectively, and the balance of pice packets remaining unsold at the end of September 1894. Statement C gives for each district the population, the fever mortality and quinine sales, and compares the position of districts with reference to the sales per thousand of population, the gross sales, and the fever mortality.

5. The following statement shows month by month the supplies of pice packets of quinine to postal officials and Civil Surgeons up to the end of September 1894, and the monthly mortality from fever per thousand of popuation during the period referred to:—

6. Out of the 3,211,266 packets issued to post-offices and Civil Surgeons, 2,391,594 were sold and 819,672 remained in stock at the close of the period. The monthly average of sales was 104,669 packets, against 11,478 for the first five months of the period. This indicates satisfactory progress, so far, at any rate, as the Postal Department is concerned. The results of sales through Civil

Surgeons are less encouraging, and vary so greatly from district to district that they will for the present be left out of account in judging of the general success of the scheme.

7. Taking, then, the returns of supplies to post-offices as given in column 2 above, it should be explained that the high figures of the first three months represent the original stocks sent out to post-masters. By the end of January 1894 all offices had been fully supplied, and from that time onward the statistics of supply may for practical purposes be treated as statistics of sale, as a new supply is sent out only when the previous one is nearly exhausted. From February to May 1893 the demand was small, the experiment was a new one, and large stocks were in hand. In June of that year the demand began to increase, and it rose rapidly up to November, when the indents for fresh supplies reached the high figure of 309,978 packets. From that point the figures decline (with a rise in March and April 1894 corresponding to an increase in the fever mortality) to 88,842 in June 1894, rising again as the rains set in to 196,146 in September 1894, the last month for which statistics are now available. It is significant and encouraging to observe that while the indents during the five months May to September 1893 amounted to 446,453 packets, the supplies in the corresponding months of 1894 came to 746,538 packets, an advance of 67 per cent., and that the monthly average for the twelve months ending September 1894 was 175,851 packets. It may fairly be concluded that the rise and fall of sales varying with the unhealthiness of the season, and the great difference in the figures of corresponding periods in two successive years, show that the uses of quinine are beginning to be more generally known, and that there is a growing demand for it in the form in which it is now sold.

8. The next point of interest is the extent to which quinine is purchased in different districts. The object in view is that the most feverish districts should be the largest consumers; but this result, if ever arrived at, can hardly be looked for until the system of selling quinine by the dose has been longer in force, and the people have got to know thoroughly the virtues of the drug and the places at which it can be procured. At present, though a degree of success has been attained, Statement C shows that there have been many failures. This statement gives for each district in Bengal the population, the rate of fever mortality for the last three years, the actual quantity of quinine sold, and the relative quantity per thousand of population. It further shows the relative order of the districts in regard to fever mortality, actual sales of quinine through the post-office, and relative sales per thousand of population. The following lists bring out some of the most striking points in the statement:—

Districts in order of fever mortality (average of 1892-94).	Districts in order of actual sales of quinine.	Districts in order of relative sales per thousand of population.
1. Rajshahi.	1. Jessore.	1. Nadia.
2. Jessore.	2. Nadia.	2. Jessore.
3. Malda.	3. Mymensingh.	3. Hooghly.
4. Jalpaiguri.	4. Shahabad.	4. Khulna.
5. Dinajpur.	5. Midnapore.	5. Burdwan.
6. Rangpur.	6. Burdwan.	6. Shahabad.
7. Monghyr.	7. Backergunge.	7. Darjeeling.
8. Shahabad.	8. Khulna.	8. Midnapore.
9. Nadia.	9. Hooghly.	9. Backergunge.
10. Murshidabad.	10. Faridpur.	10. Mymensingh.

Clearly if the demand for quinine had been developed to the point of rising and falling in correspondence in the ratio of fever mortality, the same districts ought to figure in the same order in the first and third lists; but in fact out of the ten districts which show the highest average fever mortality, only three, Jessore, Nadia, and Shahabad, appear in the group of districts which have the highest relative consumption of quinine. Rajshahi, which heads the list of bad fever districts, stands only 17th in respect of its relative demand for quinine, while Malda, Jalpaiguri, Dinajpur, Monghyr and Murshidabad are also low down. Endeavours will now be made to trace the causes of this state of things. The Inspector-General of Jails will be asked to furnish the Sanitary Commissioner with detailed statistics for each office of supply, and it is hoped that

the latter officer, by examining his own statistics and by local inquiries conducted by his own inspecting staff in communication with the district officials, will be able to suggest means of further pushing the sales. If it should be the case, as seems not unlikely, that in some of the most feverish parts of these districts post-offices are comparatively sparsely situated, and therefore more difficult of access, it should be considered what other agency could usefully be employed to supplement the sales by the Postal Department.

9. It was observed above that out of a total of 3,211,266 pice packets supplied to postal officers and Civil Surgeons up to the 30th September 1894, only 305,184, or 9·5 per cent., were supplied to the latter. The actual sales up to the same date amount to 2,391,594 packets, of which only 105,468, or 4·4 per cent., were sold by Civil Surgeons. There are no doubt many more post-offices than there are dispensaries, but this of itself hardly accounts for the great disproportion between the sales effected by the two selling agencies; and it is further noticed that up to the 30th September 1894 the Postal Department sold out 78 per cent. of their supplies, while the Civil Surgeons only got rid of 34 per cent. Again, not only were the amounts sold by Civil Surgeons absolutely and relatively much less than those sold by the Postal Department, but the results obtained by the former agency vary remarkably from district to district. Thus in seven districts,* some of which have a high rate of fever mortality, the jail returns show that the Civil Surgeons had not succeeded in selling a single pice packet up to the end of September 1894. In two cases, indeed, the Jail Department's returns were disputed, but the amounts alleged to have been sold were small and the remittances appear not to have been made till after the close of the period under review. On the other hand 17,544 packets were sold by Dr. Murray of Shahabad, 11,016 by Dr. Kelly of the Sonthal Parganas, 10,404 by Drs. Stephens and Sinha of Jessore, and 9,792 by Dr. Macdonald of Saran. In reporting on the subject, the Inspector-General of Civil Hospitals mentions that some Civil Surgeons object to selling quinine at dispensaries on the ground that patients expect to get all medicines free, and that it lays medical subordinates open to charges of corruption. Dr. Harvey considers this argument more plausible than sound, and recommends that the experiment be continued, remarking at the same time that the difficulty referred to seems to be met with in inverse ratio to the trouble taken by the Civil Surgeon.

10. On this branch of the subject the Lieutenant-Governor has arrived at the following conclusions. The sale of quinine by the Civil Surgeons is carried on by means of two agencies—the medical subordinates who remain stationary at the dispensaries, and the vaccination subordinates whose business it is to be constantly travelling in the interior of their districts. Against selling quinine at dispensaries it may fairly be urged that the practice tends to conflict with the long-standing usage of giving medicines free, and may thus lead to confusion in matters of account; that involves competing with the post-offices and thus reducing the commission payable to post-masters and their interest in pushing the sales; and lastly, that it gives an amount of trouble out of proportion to the results obtained. In the Lieutenant-Governor's opinion these arguments have much weight, and he proposes to order the supplies to dispensaries to be stopped. The stocks now in hand can either be sold off by degrees or transferred to the nearest post office, as may be arranged by the Jail Department in communication with the Civil Surgeons concerned. But while relieving the Civil Surgeons from the supervision of the sale of quinine through dispensaries, the Lieutenant-Governor must insist upon their giving special attention to its sale through their subordinates employed on vaccination. These officers move about constantly in the rural portions of their districts, and they are specially fitted to supplement the agency of the post-office in pushing the sale of quinine. Every vaccinator and sub-inspector of vaccination should therefore be supplied with parcels of quinine packets, and should be allowed the commission which is given to post-masters. A special paragraph should be devoted to the working of these orders in the annual report submitted by Civil Surgeons to the Inspector-General of Civil Hospitals.

11. One effect of discontinuing the supply of quinine to dispensaries will be to leave certain towns, where quinine is not now supplied to the post-offices, without any agency for the sale of quinine in pice packets. In the Home Department letter No. 373 of the 8th July 1892, conveying the sanction of the Government of India to the co-operation of the post-office in the scheme as originally launched, it was assumed that the principal object of the proposal being to place quinine within easy reach of the population, it would not be necessary to have recourse to post-offices in the larger towns where other suitable agencies were likely to be found. Further experience has, however, shown that the poorer classes in the so-called towns stand in as great need of pure quinine, and have nearly as much difficulty in getting it, as the people of the interior; and now that it has been decided, for the reasons stated above, to discontinue the supply of quinine to dipensaries, the Lieutenant-Governor trusts that there will be no objection to extending the sale through the postal officials to the larger offices hitherto excluded from the scheme.

12. The following statement submitted by the Inspector-General of Jails gives an abstract of the financial results of the experiment from its commencement to the 30th September 1894 :—

13. The figures of this statement do not agree with those given in statements A and B, because the latter refer to post-offices and Civil Surgeons only, and do not include supplies to and sales by other persons which have been mixed up with the transactions of Civil Surgeons. Special care must be taken in future in dealing with the accounts and statistics of quinine, and before returns are submitted all discrepancies between the figures prepared by the Jail Department and those supplied by Civil Surgeons should be examined and reconciled by the Superintendent of Jail Manufactures. Taking the present figures as they stand, it appears that Government has made a profit out of the experiment of Rs. 7,870. This was no part of the original scheme; but medical advice is opposed to increasing the quantity of quinine in each packet, and it is clearly impossible to reduce the price below one pice. The Inspector-General of Jails will, however, be asked to report whether anything would be gained by using a better kind of paper for the envelopes. If not, a larger commission will be allowed to post-masters.

14. Reviewing the operations as a whole, and having regard to the novelty of selling quinine by the dose, and the various difficulties of detail which had to be overcome at starting, the Lieutenant-Governor considers that the scheme has been quite as successful as could reasonably have been expected. An effective demand for cheap quinine among the masses of the people has been called into existence; the demand is shown to vary from month to month in general accordance with the conditions tending to produce fever; and there seem to be grounds for hoping that it will continue to increase if stimulated

by judicious administration. Under the scheme as now modified the post-offices all over Bengal will continue to be the main agency for distributing quinine, but attempts will made to utilise other agencies with the object of reaching the people of outlying tracts who are not within easy reach of post-offices. The employés of the Vaccination Department will doubtless be able to do much in this direction, as their duties take them into rural villages at all times of the year, and the Lieutenant-Governor trusts that District Officers and the higher sanitary officials will lose no opportunity of helping to promote sales and of spreading information as to the wishes of Government in the matter. A further extension may be obtained by imitating the measures taken by Mr. Greer, Deputy Commissioner of Darjeeling. In that district (in parts of which the mortality from fever is extremely high) quinine is now sold or shortly will be sold, at no less than 19 rural centres in addition to places where there are post-offices. The vendors are for the most part respectable shop-keepers. They are supplied with parcels containing 102 packets of quinine, on the same terms as postal officials. With the first supply, a vernacular notice is sent to them stating the conditions, and they are required to agree to sell the quinine at one pice per packet, and to remit the price to Government, less commission of six packets per parcel. A notice signed by the Deputy Commissioner, stating the selling price per packet, is posted up in each shop. Eight vendors have repaid the price of the quinine they have had, and there is said to be no doubt as to the recovery of the balance. The Lieutenant-Governor desires to bring this experiment to the notice of all district officials, and he hopes that what has been found to work well in Darjeeling may prove equally practicable in other districts. All Magistrates of districts are authorised to indent on the Superintendent of Jail Manufactures for the necessary supplies of quinine; and they should arrange to remit the sale proceeds to that officer.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

2. The statement in the margin, which compares the number of patients in the five native asylums in Bengal during the last two years, and summarises the main facts regarding them, shows that the number of admissions fell off by five.

The number of deaths and discharges dropped from 240 to 193, and the daily average strength from 932 to 915. The number of criminal lunatics in confinement on the last day of the year was 463, against 445 at the end of 1893, while that of the non-criminal lunatics fell from 471 to 460.

3. Of the 200 persons admitted and readmitted, 108 were criminal lunatics and 92 non-criminal; the figures for the previous year being 103 and 102 respectively. The re-admissions during the year fell from 24 to 20, the decrease occurring in all the asylums except Dullunda, where 14 patients were re-admitted in 1893 against 5 in 1894. Seven of these were criminal lunatics remanded to the asylum after trial; four were cases of insanity, recurring after various intervals of temporary recovery; and three were patients who had been made over to their friends, but were found too troublesome to be kept at home.

4. The number of lunatics discharged fell from 163 to 118, the fall affecting all asylums except Dacca. It was most marked in Dullunda (35) and Patna (19), and in both these institutions the decrease is said to be due to the success attained in the previous year in inducing the friends of harmless lunatics to take charge of them. In this way Dullunda got rid of 78 patients and Patna of 34, as compared with 43 and 15 respectively in 1894, and it is stated that the harmless patients still remaining have no friends or relations willing to take charge of them. The increase in discharges at Dacca from 26 to 42 is put down to the larger number of recoveries.

5. At the close of the year there were 463 criminal lunatics in confinement. Of this number, 185 had been actually tried, acquitted on the ground of insanity, and ordered to be kept in safe custody; 252 had been detained as incapable of making a defence, and 26 were persons who being already in jail for an offence had become insane there, and been transferred to an asylum. The numbers of each class in the previous year were 176, 242, and 27. The daily average strength rose from 441·42 to 448·19, and was higher than in any of the last ten years except 1891. The Inspector-General of Civil Hospitals (Surgeon-Colonel Harvey) remarks that these figures tend to confirm the opinion expressed by him in last year's report, that the operations of the rules framed in 1888 for dealing with criminal lunatics increase the number of such lunatics under detention. It seems, however, doubtful whether these rules have been in force long enough to make it possible to judge of their effect on the number of criminal lunatics, and in any case the question is of no practical importance, as no one

would propose to alter the rules because they added slightly to the period for which criminal patients were detained.

6. The capacity of the different asylums remained unaltered during the year, but in Dacca four new cells for female patients have since been completed, and are now in use. This raises the standard of accommodation to 41, which is only slightly below the average daily strength. On the male side of the asylum, accommodation for 50 extra patients was added in 1891, and this has rendered it possible to transfer lunatics from Chittagong to Dacca instead of Dullunda.

7. In statement VII, showing the causes of insanity, only 40 cases out of the 200 admitted are put down to ganja-smoking, against 55 in the previous year, and Dr Harvey observes in explanation of the reduction that the theory that hemp drugs cause insanity is less readily accepted than it used to be. In reviewing the report for 1890, the Lieutenant Governor referred to the proneness of some persons to conceive ganja a fertile cause of insanity; and in the Resolution on the report of 1892 the Inspector-General of Civil Hospitals was asked to enquire into some of the cases attributed to ganja-smoking, and to ascertain on what data this diagnosis was based. Mention was also made of the suggestion that it is as reasonable to suppose that excessive ganja-smoking may be due to insanity as that insanity may be due to excessive use of ganja. In dealing with the report of 1893, the Lieutenant-Governor observed that whenever a lunatic was reported by the police to be a ganja-smoker, it was too easily assumed that that drug was the cause of insanity; and he agreed with Dr. Harvey in thinking that in past years many cases had been attributed to ganja on most insufficient grounds. The question of the connexion between insanity and ganja has since been exhaustively examined by the Hemp Drugs Commission. The Commission found that in the great majority of cases the asylum statistics as to the supposed cause of insanity were based wholly on the descriptive rolls or similar papers received with the lunatics. For this reason they set aside the statistics as quite untrustworthy, and undertook a special enquiry into all the cases admitted into asylums in India in 1892 and ascribed to hemp drugs. They did in fact on a larger scale and with more elaborate machinery what the Lieutenant Governor had asked the Bengal Inspector-General to do in 1893. The conclusions arrived at by them after a most exhaustive inquiry entirely bear out the impression which Sir Charles Elliott had long ago formed from facts which came before him in the course of ordinary administration. The following statement summarises their results:—

	Number	Percentage on admissions.
Cases admitted in 1892	1,344	... ...
Cause of insanity shown as known ...	775	58
„ „ „ „ unknown ...	569	42
Cases attributed to hemp drugs ...	222	16·5
„ accepted by the Commission as due to hemp drugs	61	4·5
"Mixed" cases (hemp only one of several possible causes)	37	.....
Total cases held by the Commission to be more or less connected with hemp drugs...	98	7·3, or 12·6 on "known" cases.
Cases rejected by Commission	124	.....

It appears from the report that the above figures, if taken by themselves, tend rather to exaggerate the part played by ganja in causing insanity. Thus among the 37 mixed cases, in which ganja ranks only as one among several possible causes, there were 7 into which heredity entered as a predisposing factor, 18 may have been due to alcohol, and three to dhatura; while out of the remaining 61 accepted as due to hemp drugs, there were 22 with regard to which no satisfactory evidence could be procured; and a great majority of the rest came from the lower orders of cultivators and labourers, about whom it was not easy to ascertain more than the fact that they indulged in ganja. Whether that habit was the cause or one of the causes of the insanity, or even whether it preceded the insanity was much more difficult to establish. Subject, however, to these deductions, the Commission accepted it as reasonably proved in the

absence of evidence of other causes that hemp drugs do produce insanity, though in far fewer cases than has hitherto been popularly believed. Sir Charles Elliott welcomes this conclusion, not merely as confirming an impression which he had already formed, but as tending to remove what has long been a blot on our management of asylums, and to bring about the separation and intelligent treatment of persons suffering from ganja insanity. For the Commission further show that the form of insanity thus caused is usually of a temporary character, and lasts for a shorter time than insanity arising from other causes. If in future Superintendents of Asylums study carefully the mass of information collected by the Commission on this subject, it may reasonably be hoped that substantial progress will be made in the diagnosis and curative treatment of cases of ganja insanity.

8. The improvement noticed last year in the health of the inmates of the asylums has not been maintained The average daily number of sick rose to 55·41 from 49·25 in 1893, and the percentage of chronic invalids to average strength was 6·05, against 5·28 in the previous year. Dr. Harvey points out, however, that these figures are low when compared with the rates of admission to hospital among British and Native troops in India, which in 1893 were 100·4 and 82·9, respectively, excluding venereal diseases.

Moreover, the death-rate of 8·19 per cent. is slightly lower than last year's and compares favourably with all other asylum rates in India, except that of the North-West Provinces The actual number of deaths fell from 77 to 75. Taking the individual asylums, it is observed that at Dullunda, Patna and Berhampore more patients were admitted into hospital than in 1893, while Dacca shows a decrease in this respect. At Dullunda, however, the increase of 57 includes 30 cases of mere debility without any definite disease. The increase of 14 at Patna is ascribed to the prevalence of bowel-complaints, while of the increase of 45 cases at Berhampore, 32 are accounted for by influenza, and the rest by fever being somewhat more prevalent than in 1893. The decrease of 89, or 36·47 per cent., at Dacca is explained by the fact that in the previous year 87 patients were admitted for influenza, while none suffered from this disease in 1894. There were two cases of cholera, apparently caused by drinking polluted water in the Dullunda Asylum, one of which indicated great carelessness on the part of the hospital attendants.

9. Seventeen cases of injuries and accidents are recorded as compared with 10 in 1893 and 11 in 1892. Eleven of these took place at Dullunda, of which 3 were assaults by lunatics on lunatics and 8 minor accidents. At Dacca there were two cases of fractured ribs caused by kicks from other lunatics, who had up to that time shown no tendency to violence. An epileptic was burned, and a woman sprained her hip. At Patna one lunatic was thrown down by another and broke his collar-bone, and a woman broke the small bone of her left forearm in trying to escape. The warders whose neglect contributed to these accidents were in each case adequately punished At Cuttack and Berhampore there were no casualties. It speaks well for the management of the asylums that no cases of ill-treatment of lunatics by warders occurred during the year.

10. Three escapes took place—two from Berhampore and one from Dullunda. In all three cases the lunatics were recaptured, and the officials in fault punished.

11. The income and expenditure of the last two years, are shown in the following table:—

The increase of Rs. 8,999 in the total expenditure is virtually accounted for by larger expenditure on account of buildings and repairs and the increased demand for rates and taxes, neither of which items, as Dr. Harvey points out, are under the control of the Asylum authorities. The Public Works Department spent Rs. 11,518-8 on asylums during the year, as compared with Rs. 5,280-4-8 in 1893, Rs. 2,536-10 in 1892, and Rs. 11,544-7-5 in 1891. The expenditure of 1894 included Rs. 5,074-12-9 at Dullunda for a new latrine and sewage connexions, and Rs. 3,366-14-3 at Dacca for raising part of the walls, improved ventilation, and a mortuary. The increase under rates and taxes was caused by demands appealed against as excessive in 1893 having to be met during 1894.

12. The expenditure under the large head of "Diet" shows a reduction of Rs. 342-3-8. The average cost of feeding patients was—Dullunda, Rs. 42-0-6; Dacca, Rs. 43-10-3; Patna, Rs. 35-5-11; Cuttack, Rs. 40-6-4; and Berhampore, Rs. 34-11-8, as compared with Rs 41-9-5, Rs. 44-11-6, Rs 32-3-2, Rs. 38-7-1 and Rs. 35-15-4 respectively in 1893. The slight increase at Dullunda was due to extra diet allowed to the large number of patients treated in hospital for debility. At Patna and Cuttack food-grains are dearer, and the average at the latter asylum was further increased by the presence of a single Eurasian inmate.

13. The gross cost of each lunatic at the different asylums and the cost per head of average strength, taking all charges into account, is compared in the following statement for the last two years :—

The causes of the increases shown have been explained above. The average cost at Cuttack, as was stated in the Resolution on the Report for 1893, is necessarily high owing to the small number of inmates.

14. The number of paying patients fell from 34 to 31, and the daily average strength from 19·57 to 18 06. The receipts decreased by Rs. 313-11 owing partly to the smaller number of patients and partly to a falling off in the collection of arrears.

15. Satisfactory progress seems to have been made in the working of dairy farms at asylums. From Dullunda a profit of Rs. 1,108-6-1 is reported, though it may be doubted whether in such an undertaking ten per cent. is a sufficient allowance to make for depreciation. The Dacca Asylum supplied its inmates, and sold milk to the public for Rs. 674-7-3. The calves were also utilised for supplying vaccine lymph to the asylum, the jail, and the outside population. The proposed dairy at Berhampore has not yet been opened. The Lieutenant Governor agrees with the Inspector-General in thinking that the Cuttack dairy, which works on a very small scale, may be given up, milk being procured for the lunatics from the Jail.

16. The number of patients in the European Asylum at Bhowanipur remained the same as last year. Forty-one were old patients, and 23 were subsequently admitted—64 in all, two being criminal lunatics Four were discharged as cured, compared with 9 in the previous year, two deported to Europe under the Merchant Shipping Act, 11 transferred to the care of friends, one was made over to the military authorities, one transferred to Dullunda to make room for a more urgent case, and six died, leaving 39 under confinement at the close of the year. The daily average strength was 40 37, as compared with 36·78 in 1893. The male ward was slightly overcrowded for a time, but the greatest number detained on any one night was only two in excess of the scale capacity. Additional accommodation will be provided in the female ward as soon as funds are available. Only nine persons were admitted to hospital during the year; and although the death-rate rose from 10·87 to 14·87 per cent., no stress can be laid upon ratios where the total number of inmates is so small. Although the total expenditure of the year rose from Rs. 21,805 to Rs. 23,350, the average net yearly cost to Government of each lunatic, after deducting receipts from paying patients, was reduced from Rs. 295 to Rs 210. This was mainly due to a rise in the amount received from paying patients from Rs. 10,875 in 1893 to Rs. 13,703 in 1894. At the same time the Government contribution, which in 1891 amounted to Rs. 15,541, or 61·21 per cent. of the total income, has fallen in the year under review to Rs. 9,624, or 41 21 per cent.

17. The rules for the control and management of the lunatic asylums in Bengal are still under the consideration of Government, and will be issued shortly. Opportunity will be taken to carry out the recommendations of the Hemp Drugs Commission in regard to a more careful and accurate diagnosis of the causes of insanity, especially when the disease is attributed to ganja-smoking, and to provide for the separation, as far as possible, of patients who are behaved to be suffering from this cause.

18. The Lieutenant-Governor has observed with pleasure that the Inspector General of Civil Hospitals visited all the asylums during the year, and looked carefully into their requirements. With the single exception of Berhampore, where, owing to difficulties with the Municipal Commissioners, which have since been got over, the conservancy arrangements were defective, the sanitary condition of the asylums was found to be satisfactory. In other respects Dr. Harvey considered these institutions to be well and carefully managed, and to provide their inmates with comforts and means of recovery which they could not otherwise have. At the same time he was careful to deprecate any comparison with English asylums, which are in charge of specialists, giving their whole time to the treatment of mental disease, and are worked on a far more expensive scale than would be possible with the resources at the disposal of the Bengal Government. In conclusion Sir Charles Elliott desires to thank Dr. Harvey and the the Superintendents of the Asylums for their judicious and economical management of the institutions to which this excellent report bears witness.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

RESULT OF EXAMINATION FOR ADMISSION TO THE EXECUTIVE BRANCH OF THE PROVINCIAL AND SUBORDINATE CIVIL SERVICE AND THE OPIUM DEPARTMENT.

RESOLUTION.—No. 171A.—D.

APPOINTMENT.

Dated Darjeeling, the 11th May 1895.

READ—

The Resolution of the 12th May 1894, reviewing the result of the examination held in March of that year, and appointing candidates to be probationers in the Executive Branch of the Provincial and Subordinate Civil Service.

The Notification of the 6th November 1894, publishing rules for the examination for admission to the Executive Branch of the Provincial and Subordinate Civil Service of 1895.

The Notification of the 13th November 1894, declaring that one native of India, of unmixed descent, would be selected by competitive examination for admission into the Opium Department at the examination prescribed for candidates for the Executive Branch of the Provincial Civil Service.

The Reports of the Examiners at the examination held on the 1st, 2nd, 3rd and 4th April 1895.

The seven Probationary Deputy Collectors and 14 Probationary Sub-Deputy Collectors appointed on the result of the examination held in March 1894, have all been absorbed into officiating or substantive *pro tempore* appointments. The policy of promoting deserving Sub-Deputy Collectors to officiate as Deputy Collectors has been adhered to. During the year 1893-94, 16 Sub-Deputy Collectors, and during the year 1894-95 no less than 28 Sub-Deputy Collectors, have received promotion to the grade of Officiating Deputy Magistrate and Deputy Collector.

2. In November last it was notified, in the same way as had been done in previous years, that at an examination to be held in March 1895, seven candidates would be selected for Probationary Deputy Collectorships on a subsistence allowance of Rs. 50 a month, and seven for Probationary Sub-Deputy Collectorships on a subsistence allowance of Rs. 30 a month respectively. It was announced that four of the probationers for Deputy Collectorships would be appointed from the first four candidates on the list in order of merit, that three would be selected by the Lieutenant-Governor from amongst those who have obtained a minimum of one-third of the total marks, and that from the remainder of those qualified by obtaining one-third of the total marks, the Lieutenant-Governor would select seven more candidates as probationers for Sub-Deputy Collectorships. In the same month it was also notified that selected candidates would be allowed to compete at this examination for the Opium Department, and that the candidate who obtained the highest aggregate of marks would be admitted to that department.

3. The examination so notified was held on the 1st, 2nd, 3rd and 4th of April 1895. No fewer than 165 competitors obtained permission to compete, and of these 160 (all of whom, except seven,* were graduates) actually appeared and sent in papers. Of these 160 candidates, 115 took up Bengali as their vernacular, 36 took up Hindi or Hindustani, and 9 took up Uriya. It is a matter of regret that out of this large number of candidates, there should have been only 18 Muhammadans, 11 Bihari Hindus, and 9 Uriyas. These numbers show, however, an increase on the number of such candidates in previous years. The total number of candidates who obtained one-third marks was 108 only.

* Of these seven, six failed to obtain one-third marks.

4. A consideration of the number of probable retirements and casualties, and of the number of vacancies which will be likely to be occasioned by the deputation of officers on settlement or other duty, has shown that 21 vacancies may be expected during the current year in the grades of Deputy Magistrate and Deputy Collector. Of this number seven will, in due course, be filled up by the appointment of candidates who are now selected to be Probationary Deputy Magistrates and Deputy Collectors, and the remaining 14 appointments will be filled up by selection from among Sub-Deputy Collectors. Assuming that three ordinary vacancies will be created in the grade of Sub-Deputies during the year, this decision enables the Lieutenant-Governor to raise the number of officers to be appointed as Probationary Sub-Deputy Collectors from among the candidates at the late examination from 7 to 17.

5. The following four gentlemen, who stood first in order of merit, are entitled to appointments as Probationary Deputy Collectors:—

	Number of marks.
Babu Kshitish Chunder Sarkar, B.A.	475
„ Probodh Chandra Chatterji, M.A.	449
„ Nund Kishore Lall, B.L.	434
„ Hari Bhushan De, B A.	433

6. The following three candidates have been selected by the Lieutenant-Governor for appointment as Probationary Deputy Collectors after careful consideration of the number of marks obtained, the claims upon Government of members of the candidate's family, the interests of the different classes of the community, and the requirements of the public service:—

	Number of marks.
Mr. A. W. Wardo-Jones	428
Maulvi Syed Ali Ashraf, B.A.	415
Mr. W. J. Stark, B.A.	373

7. All these probationary officers will receive a subsistence allowance of Rs. 50 per mensem, and if the report from the districts in which they are stationed is favourable they will, after such period of probation as may seem advisable, be appointed to be Officiating Deputy Magistrates and Deputy Collectors as vacancies occur. They will not ordinarily be vested with magisterial powers until they are so appointed. Separate orders will now be passed posting all the gentlemen above named to districts.

8. The following are the 17 candidates selected by the Lieutenant-Governor, from among those who have obtained one-third marks, to be Probationary Sub-Deputy Collectors:—

Babu Debendra Nath Bose, M.A.
„ Jogindra Nath Sarkar, M.A., B.L.
„ Monmohan Mukherjee, B.A.
„ Ramesh Chunder Dutt, B.A.
„ Dakshinaranjan Ghose, B.A.
„ Phanindra Nath Mukerjee, B.A.
Maulvi Syud Izhar Hossain, B.A.
Babu Mohendra Nath Kundu, M.A.
Babu Akhil Kumar Chatterjee, B.A.
„ Saroda Nunda Das, B.A.
„ Suresh Chunder Chuckerbutty, B.A.
Maulvi Abdul Aziz, B.A.
Babu Sudarsan Das, B.A.
Maulvi Syed A. M. Abdul Barkaat, B.A.
Babu Balmukund Kanungo, B.A.
„ Bhupendro Nath Mozumdar, B.A.
„ Har Sahay Lall, B.A.

9. These probationary officers will receive a subsistence allowance of Rs. 30 per mensem at present, and will, if they are satisfactorily reported on, be gradually absorbed in the fourth grade of Sub-Deputy Collectors as vacancies occur. Separate orders will at once be passed posting them to districts.

10. In accordance with the notification of the 13th November 1894, already referred to, a competition was held at this examination for one probationary appointment in the Opium Department. The number of candidates for this appointment was eleven, of whom ten obtained one-third marks. The candidate who is highest on the list is Babu Abinash Chunder Roy, B.L., who obtained 414 marks and stood tenth in the combined list in order of merit. With reference to the result of the examination, the Lieutenant-Governor is pleased to direct that Babu Abinash Chunder Roy be appointed a Probationary Assistant Sub-Deputy Opium Agent of the fourth grade.

ORDER.—Ordered that the above Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,
Chief Secretary to the Govt. of Bengal.

RECEIPTS.

2. PART I.—*Jetties.*—The receipts are taken at Rs. 29,900 more than those of 1894-95. The increase is based on actuals.

3. PART II.—*Inland Vessels Wharves.*—The receipts are taken at Rs. 14,600 over last year's estimate. The increase is based on actuals.

4. PART IV.—*Port or Harbour Master's Department.*—The receipts are estimated at Rs. 30,040 less than those of the previous year. The estimate has been reduced on account of the receipts during the previous year having decreased by reason of vessels making shorter stays in the port.

5. PART VI.—*Tramway.*—The earnings are estimated at Rs. 10,000 more than those of the previous year. The increase is based on actuals.

6. PART VII.—*Port Approaches.*—The receipts are taken at Rs. 24,750 over last year's estimate. Judging from the actuals of the receipts from port dues up to the end of January 1895, an increase of Rs. 25,000 is expected from this source, and hence the increase in the estimate.

7. PART VIII.—*Kidderpore Docks.*—The receipts are estimated as follows:—

	Rs.
Receipts from graving dock	1,00,000
Landing charges on imports } Shipping charges on exports }	2,50,000
Rent and miscellaneous	47,000
Proportion of receipts for towing vessels by hopper barges	3,000
Total ...	4,00,000

There is an increase of Rs. 1,00,000 in the receipts from landing and shipping charges and Rs. 32,000 in those from rent. In both cases the increase is based on actuals.

8. *Special Toll.*—The receipts for the 10 months, from April 1894 to January 1895, amounted to Rs. 6,75,700, and it was anticipated that those for February and. March would be the same as those for the corresponding months of 1894, which amounted to Rs. 1,48,726. The receipts for 1895-96 have consequently been taken at Rs. 8,25,000.

EXPENDITURE.

9. PART I.—*Jetties.*—The estimated expenditure amounts to Rs. 10,31,011 against Rs. 10,43,539 of the previous year. "Repairs to jetties, sheds, &c.," shows a decrease of Rs. 62,000, the amount provided for, viz., Rs. 55,000, having been considered sufficient for carrying out such repairs as are necessary. Under the head "Renewals and improvements" there is a decrease of Rs. 40,000, the only provisions made being those for the repairs and improvements of the Budge-Budge depôt, and for protecting the foreshore. For these an estimate of Rs. 10,000 has been provided. On the other hand there is an increase of Rs. 7,471 under the head "Salaries," on account of an additional establishment having been sanctioned for supervising the handling of kerosine oil at Budge-Budge, as well as an increase of Rs. 61,616 under "Working expenses," owing principally to a provision of Rs. 60,216 having been made for the labour in handling kerosine oil at Budge-Budge.

10. PART II.—*Inland Vessels Wharves.*—Under this head there is an increase of Rs. 19,563 over the estimate sanctioned last year. This is principally due to an increased provision of Rs. 8,640 on account of "Renewals and improvements" and of Rs. 7,000 on account of the repairing of landing stages.

11. PART IV.—*Port or Harbour Master's Department.*—There is an increase of Rs. 27,005 under this head over the estimates of last year. Under the head "Salaries" there is an increase of Rs. 15,532, due principally to the grant of exchange compensation allowance, and under "Port Police establishment" there is an increase of Rs 4,086, due partly to the same cause, and partly to the employment of an additional force at Watganj for maintaining order in the vicinity of the docks. "Pensions" also shows an increase of Rs. 4,663.

12. PART VI.—*Tramway.*—Under this head there is an increase of Rs. 3,872, due mainly to increased provisions on account of salaries and working expenses.

13. PART VII.—*Port Approaches.*—There is an increase of Rs. 18,389 under this head as compared with last year's estimate. "Salaries of officers and crew" shows an increase of Rs. 10,076, due principally to the grant of exchange compensation allowance, while the estimate under the head "Repairs to vessels" has been increased by Rs. 8,000 on account of a number of light vessels requiring a general overhaul during the year.

14. PART VIII.—*Kidderpore Docks.*—The expenditure under this head is estimated at Rs. 19,97,082, against Rs. 16,30,153, the estimate of last year. The increase is due principally to an increased provision of Rs. 50,446 having been made under "Working Expenses" in view of the anticipated increase of work at the Docks; of Rs. 20,007 under "Salaries of traffic establishment" on account of an increased establishment having been kept in anticipation of the development of traffic; and of Rs. 2,87,706 under "Interest and sinking fund on dock loan" for the payment of the sinking fund which fell due on the 1st April 1895.

15. Subject to the remarks contained in the foregoing paragraphs, the Lieutenant-Governor, in pursuance of the powers vested in him by section 71 of the Calcutta Port Act, 1890, approves the estimate of income and expenditure of the Commissioners for the year 1895-96.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Lieut.-Col.*, R.E.,
Offg. Secretary to the Govt. of Bengal.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF APRIL 1895.

THE most noticeable peculiarities in the weather of the past month have been—

1. Large differences of pressure have existed at times as compared with the normal. In the early part of the month there was, sometimes for days together, a large excess in Bengal and a moderate excess over the Bay so that the distribution was much more uniform than usual. Towards the end of the month a very different arrangement obtained, there being a large defect over Bengal and steep gradients over both the Bay and the province.

2. Temperature has generally been low, both during the night and the day. Defect in mean minimum temperature was fairly uniform, but the mean day readings are more than 5° below the normal in the western districts and elsewhere by amounts diminishing towards the east, where there was a small excess. The mean temperature for the month is therefore below the normal in all districts.

3. Owing to the uniform distribution of pressure, which generally obtained during the first three weeks of the month, winds were lighter than usual, but during the last week, when the pressure arrangement was reversed and gradients became steep, very strong winds continued for several days at the head of the Bay and in Bengal.

4. Thunder-storms were very frequent, as in the latter half of March, but with the same peculiarity that the rainfall due to them was much lighter than usual. Owing, however, to their frequent occurrence, the total rainfall has been considerable, and it is only at a few stations in the south of the province that the fall for the month is below the average.

5. As in the past two years, a cyclonic storm developed in the south of the Bay. There was an important difference this year, so far as Bengal is concerned, because the depression, instead of crossing the Burma coast, took a more northerly direction, passing close to Akyab and breaking up in the hilly region between Bengal and North Burmah. It was followed by very unsettled weather for some days in Bengal and Assam, and heavy rain fell in the eastern districts.

During the first week of the month ordinary weather prevailed. Pressure gradients were rather steeper than usual at that season because of a slight defect in Bengal, and excess in the south of the Bay. Temperature was normal or above except in the south-western districts, and occasional thunder-storms gave light showers of rain. The high pressure, which was such an important feature of the weather about the middle of the month, first began to develop on the 7th and succeeding days, but it was only temporary till the 13th when a rapid rise gave a large excess in North Bengal and Assam. This arrangement developed and remained with little change till it was upset by the approach of the cyclonic storm from the Bay on the 25th.

During the second week, while considerable pressure oscillations occurred, weather was not so settled. The wind circulation was irregular, and local storms occurred in considerable numbers in all districts, except Bihar and Chota Nagpur, where rainfall was all but entirely absent. Though the thunder-storms were frequent, the showers caused by them were light, except in East Bengal. A more decided result of these local disturbances was the low temperature which prevailed throughout the week, the effect being equally apparent by night and by day.

During the third week the weather conditions were unusual because of the large differences from the normal noticeable in pressure, temperature, &c., and also because of the steadiness with which these abnormal features prevailed from day to day. The pressure distribution was unusually uniform, and had a marked influence on the other meteorological elements. Easterly winds prevailed, and numerous local storms occurred, chiefly in the southern half of the province. Though the rainfall was not heavy, the air remained unusually cool except in the extreme north and east.

While pressure remained high in Bengal and the north of the Bay, slow downward changes led to the formation of a shallow low-pressure area in the south or south-west of the Bay. As the depression was at first very shallow and diffused, there was little likelihood of its giving rise to disturbed weather. But on the 22nd wind velocity increased in the south of Ceylon, and heavy rain was reported from Galle. The squally weather, which was then probably prevalent over the extreme south of the Bay, extended northwards, and on the 23rd was beginning to be felt in Burmah. The sea became rough at Diamond Island and on the Orissa coast, while a regular cyclonic circulation of winds prevailed over the Bay, as shown by the indraught across the coast at nearly all stations. On the 25th the disturbance was more concentrated, and was evidently moving in a north-easterly direction. There was a brisk fall of pressure in Bengal and over the Bay, and heavy rain had begun at Diamond Island. During the following day the movement of the depression was very rapid, and the centre crossed the coast near Akyab, where a gale blew for several hours on the night of the 25th. The fall of pressure was very rapid near the centre, as was shown by the changes both at Akyab and Chittagong. The fall at Chittagong on the 26th was a quarter of an inch, at Narayanganj ·183 inch; and though the fall at Akyab was a fifth of an inch, the rapid rise which follows the passing of a storm had been felt there for some hours.

Squally weather was general over the Bay and in Lower Bengal, but owing to the easterly motion of the disturbance, these squally conditions were of short duration. The rain squalls were felt while winds were easerly, and the north-westerly dry winds which soon followed gave fine weather over the north-west of the Bay and the greater part of Bengal, even while the storm was still raging in the north-east angle of the Bay. The disturbance broke up very quickly after the centre crossed the coast, and numerous thunder-storms occurred in the eastern districts, attended by heavy rain. The pressure distribution which remained after the depression disappeared was the reverse of what obtained a week before. While there was a rapid rise in East Bengal, there was a rapid fall in the western districts. A residual depression appeared over the south of Bihar and Chota Nagpur; and though its position oscillated from east to west, it remained over the province till the end of the month, and exercised an important influence on the weather during the last few days. The gradient was steep, and very strong winds prevailed. The thunder-storms on the east side of the area of lowest pressure kept the temperature several degrees below the normal, while the westerly winds in the western districts caused a great excess of heat, maximum temperature in places being as much as 112°.

Pressure.—In the early part of the month the pressure distribution differed very little from the normal About the beginning of the second week high pressure began to develop over Bengal, but it gave way for a day or two, and ultimately became established about the 13th. During the ten days that followed readings remained unusually high, and the distribution was uniform both over the Bay and the province. On the 24th the advancing depression became felt, and till the end of the month there was defect of about as much as was the previous excess. The pressure arrangement has therefore been very different from that usual during April, and the long period of high readings in the middle of the month has had a sensible effect on the means which are above the normal by amounts varying from ·02 inch in Orissa to ·05 inch in North Bengal and Bihar.

Temperature has been unusually low over the whole province, with the exception of one rather important break towards the end of the month in Orissa, Chota Nagpur, and the adjacent part of South-West Bengal, where some stations recorded very high day readings and nights were considerably hotter than usual. The means, however, are below the normal in all districts. Defect is 3·9° in Chota Nagpur, nearly 3° in Orissa and South-West Bengal, over 2° in Behar, 1·7° in North Bengal, 1·2° in East Bengal, and nearly 1° in Assam. These defects diminish from the south-west towards the north-east—an arrangement which is largely due to the day temperatures, as the difference from the average minimum reading is much more uniform.

Rainfall has been well distributed both over the province and throughout the month. In the early part falls were light and scattered, but during the last three weeks frequent showers fell in all districts. After the cyclonic storm broke up on the 26th heavier rain fell in East Bengal and Assam. The fall for the whole month is above the normal at all stations except in part of Bihar and South-West Bengal, where there is a considerable deficiency. The districts where less than the usual fall has been received are—Hooghly, Howrah, 24-Parganas, Calcutta, Khulna, Saran, Champaran, Darbhanga and Purnea. The stations that have reported the heaviest falls are—Gnatong, Dacca, Mymensingh, Noakhali, Balasore, Sibsagar and Silchar.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question tations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 11th of May 1895.

CALCUTTA, *the 14th May* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 11TH OF MAY 1895.

DURING the previous week weather was slightly disturbed in Bengal and thunderstorms occurred in all districts. The unsettled conditions moved westwards across the province, and at the beginning of the week under review were felt only in the western districts. Thunder showers were almost general in Bihar and Chota Nagpur during the first two days of the week, and caused a large fall of temperature, especially in the west of Bihar.

These disturbances were due to a shallow low pressure area which moved in a westerly direction and was felt more in the northern districts. As the recovery of pressure followed, fine settled weather became general, and temperature, which at the beginning of the week was below the normal except in the extreme east, slowly rose to its customary height, and by the end of the week was relatively high in all districts.

On the 5th, the first day of the week, a ridge of high pressure extended from North Bengal southwards over the central districts. Within this area pressure was in excess by more than ·15 inch, while both to east and west of it the difference was smaller. Gradients were therefore much steeper than usual over Bihar and Chota Nagpur, and the distribution more uniform towards the south and east. The oscillations usual in settled weather occurred, but the excess which prevailed at the beginning of the week never altogether disappeared. A moderate fall prevailed on the 6th and 7th and was followed by a slow rise on the 8th. Pressure again fell on the 9th and rose on the 10th and 11th. These changes all began in the east and moved westwards. The rather uniform distribution which obtained during these days gave rise to light winds and almost cloudless skies. The rise of temperature, therefore, went on with little interruption following the waves of pressure from east to west, and by the end of the week there was excess in all districts, greatest in Bihar, North Bengal and Assam, where it varied from a little under 5° to nearly 7°.

Pressure.—As stated above, waves of pressure passed from east to west during the week, giving rise to moderate changes. The distribution was always above the normal by varying amounts, and the means for the week are consequently in considerable excess. The smallest difference is in Assam and part of East Bengal, where it is less than ·05 inch. In the other districts excess varies between ·05 inch and ·1 inch.

Temperature.—At the beginning of the week temperature was below the normal except in East Bengal and Assam, and defect increased towards the west. The wave of rising temperature moved slowly across the province, and it was not till near the end of the week that defect disappeared. The highest day temperature was experienced on the 11th in all districts except Assam and North Bengal, where it was on the 8th, and the lowest minimum readings were usually between the 6th and 8th. The mean difference from the normal is greatest in Assam and becomes less towards the west. There is excess of 2°·8 in North Bengal, 1°·8 in East Bengal, and almost normal values for South-West Bengal and Bihar. In Orissa and Chota Nagpur there is defect of 1° and 3°·7 respectively.

Rainfall.—Except the showers in Bihar and Chota Nagpur on the two first days and scattered showers throughout the week in East and North Bengal, very little rain has fallen. The average falls are below the normal in all districts except Chota Nagpur, where rather more than the normal amount was received. The falls in Orissa and South-West Bengal are less than a tenth of the normal fall, in East Bengal about a fourth, and in North Bengal less than a half. Bihar received ·5 inch as compared with a normal of ·63 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 11th of May 1895 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

By night:—In addition to the ordinary lights, *two red* lights, placed vertically 6 feet apart in globular lanterns of not less than 8 inches in diameter, and in such a position with respect to the ordinary *white* light as to indicate, as nearly as possible, the position and extent of the obstruction.

Also to station a lookout, on board or in a boat, to give warning to approaching vessels.

Shoal S. S. W. of Halfway island.

THE British Admiralty has given notice (No. 195 of 1895) that the steam vessel *Duke of Buckingham* recently touched on a shoal patch, situated near the track recommended, about 8¼ miles S.S.W. (S. 22° W.) from Halfway island, or approximately in lat. 11° 26′ S.; long. 142° 56′ E.

It is probable that this is the shoal reported by Captain Pearn in 1876 about one mile north-east of this position, and which has hitherto been searched for in vain, but which still remains on the Admiralty chart.

FINAL REPORT ON THE WHEAT CROP OF 1894-95 IN BENGAL AND BIHAR.

The following is published for general information.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

REVENUE DEPT.,
The 21st May 1895.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Wheat Crop of 1894-95 *in Bengal and Bihar.*

Returns have been received from 27 districts in which wheat is grown in these Provinces, viz., from all the districts of the Patna, Bhagalpur, and Chota Nagpur Divisions, and from the Burdwan, Bankura, Birbhum, Nadia, Murshidabad, Rajshahi, Pabna, Rangpur, Darjeeling, and Faridpur districts.

Character of the season.—The character of the early part of the wheat season of 1894-95 was reviewed in the preliminary note on the wheat crop issued on the 30th January

1895. This period was marked by unusually late and heavy rainfall which lasted till the end of the first week of November, being particularly heavy in Bihar, Chota Nagpur, and North Bengal. From the second week of November, there was practically no rain until after the middle of January. In February, the rainfall was below the normal, except in the Patna Division, and in the second and in the third weeks of March light rain fell in most districts.

The area sown with wheat was somewhat curtailed on account of the continuance of the monsoon rains of 1894, and the crop seems to have been seriously affected by the absence of rain, from the second week of November to the middle of January. The rain which fell in the latter part of January and in February and March, though light, somewhat improved the prospects of the crop. Shahabad is the only district from which injury by blight is reported.

2. *Area cultivated.*—The estimates of areas sown with wheat, as reported in the preliminary forecast of the 30th January, have been modified by the District Officers of Shahabad, Bhagalpur, the Sonthal Parganas, Manbhum, and Rangpur. The total area, sown under wheat during the year under report, as shown in the appended return is 1,401,000 acres, against 1,552,600 acres as reported in the first forecast. The decrease is chiefly due to revision of estimates in the Sonthal Parganas and Manbhum. Owing to the same causes, the total estimates of normal area and last year's area have also been changed, respectively, from 1,843,800 and 1,583,800 acres, as shown in the first forecast, to 1,719,200 and 1,461,000 acres as now returned.

From column 5 of the appended statement, it will be seen that there is an estimated decrease of 4·10 per cent. in the area under wheat cultivation this year, as compared with that of last year. This decrease is due to the late monsoon rains of 1894 having interfered with sowing, as stated in paragraph 1 of this Note.

3. *Outturn.*—The Collectors of Shahabad, Patna, Bhagalpur, Purnea, the Sonthal Parganas, Rajshahi, and Pabna, and some of the less important wheat-growing districts, have reduced their estimates of this year's crop since they submitted their preliminary forecasts. On the whole, therefore, the outturn for these Provinces is now estimated at 13½ annas, as against 15 annas shown in the preliminary forecast for this year, and as against 12 annas estimated for last year's crop. The outturn of wheat in tons in these Provinces for the season 1894-95 is shown in column 9 of the attached statement to have amounted to 486,100 tons, against 458,900 tons in the previous year. The better outturn is due to the more favourable character of the latter part of the season.

4. Under orders of Government, an abstract statement showing the prices and general conditions of stocks of food-grains as reported by District Officers is annexed to this report.

5. The following summary of the harvests of the year 1894-95 has been obtained from the marginally-noted reports published by this Department :—

Final Report on the *bhadoi* crops of 1894, dated 11th December 1894.
Final Report on the winter rice crop of 1894, dated 5th December 1894.
Note on the *rabi* crops of 1894, dated 10th April 1895.

6. *Bhadoi crops.*—The season was favourable. The total area cultivated with food and non-food crops was returned as 15,682,100 acres, against 15,587,600 acres estimated to have been cultivated the previous year. A full average crop of 16 annas or more than a full average crop

was reported from 7 districts, crops varying from 8 annas to less than 16 annas were reported from 37 districts, and only from one district (Manbhum) was the crop reported to be less than 8 annas. Thirty-three districts reported the outturn to be better than that of 1893, four reported it to be equal, and eight reported it to be worse. The general yield of the bhadoi crops of 1894 was considerably better than that of 1893, being estimated at 16 annas, against 11 annas for the previous year.

7. *Winter rice crop of* 1894.—The season was very favourable to the cultivation and growth of the winter rice crop in most districts. The total area estimated to have been cultivated with winter rice was 31,388,600 acres, against 30,798,100 acres in 1893. Out of the 45 districts of these Provinces, 25 reported the crop to be a full average or better than a full average crop, 15 reported the crop as varying from 14 to 16 annas, and 5 from 12 to less than 14 annas. No District Officer returned less than a 12-anna crop. Twenty-nine out of the 45 districts reported a better outturn than that of 1893, 6 reported an equal outturn, and 10 districts reported worse crops. The general outturn of the winter rice crop for 1894 was estimated at 17 annas, against 16 annas estimated for the crop of 1893.

8. *Rabi crops of* 1894-95.—The area sown with *rabi* food-grains was returned as 9,206,300 acres, against 9,616,600 acres estimated to have been sown in the season 1893-94, the decrease being chiefly due to the heavy and late rainfall of the monsoon season of 1894. Only in 5 districts was the outturn of the *rabi* crop estimated to amount to 16 annas, 26 districts reported crops varying from 12 to 15 annas, 13 districts from 8 to 11 annas, and one district (viz. Pabna) returned a 7-anna crop. The mean outturn of the *rabi* crops for these Provinces was estimated between 13 and 14 annas, against the estimate of 12 annas for the previous year.

9. Taking into consideration all the harvests of the year, it appears that the yield of food-grains of the year in these Provinces has been above the average.

The yield of rabi food-grains is below the average, but this has been more than compensated for by the good outturn of the winter rice crop.

10. *Food stocks and prices of food-grains.*—The food stocks are reported to be plentiful in 17 districts, including seven districts of the Patna and Bhagalpur Divisions. In the remaining districts, the District Officers state that food-stocks are not plentiful or not generally plentiful.

In the fortnight ending 15th April 1895, the prices of common rice were lower in 44 districts than in the corresponding fortnight of 1894. In Rangpur only, a higher price prevailed. In all the 45 districts of these Provinces, the prices were lower than those prevailing in the fortnight ending 15th April 1893. The prices of wheat in the principal wheat-growing districts also ruled generally lower in the fortnight ending 15th April 1895 than in the corresponding fortnight of the preceding year. From the return of prices current on the 30th April 1895 in head-quarters bazars (published in the *Calcutta Gazette* of the 8th May 1895) it will be seen, that the price of common rice at the end of April ranged from 13 seers in Darjeeling to 21 to 23 seers in Manbhum. In 22 districts, common rice was selling at 14 to 17 seers per rupee; in 15 districts at 17 to 20 seers; and in 5 districts, viz.,

Bankura, Khulna, Balasore, Puri, and Manbhum, at 20 to 23 seers. Only in two districts, viz, Darjeeing and Rangpur, was the price dearer than 14 seers to the rupee.

11. *Wheat exports from Bengal and Bihar districts.*—There was a marked decrease in the rail-borne exports of wheat from Bengal and Bihar districts to Calcutta during the nine months April to December 1894, as will be seen from the figures quoted in the margin. The falling off was due to the poor outturn of the wheat crop of these Provinces during the year 1893-94, and to the short crops of the North-Western Provinces.

Exports of wheat from Bengal and Bihar districts to Calcutta during the nine months April to December.	Maunds.

In the other two sub-divisions, a larger area could not be sown owing to late rains, and on account of these late sowings, the outturn of the crop is less than what it was last year.

In the Kalna sub-division, heavy rainfall in November 1894 affected the outturn, and it will therefore be the same as was shown last year. Owing to seasonable rainfall at sowing time, the outturn in Katwa sub-division has been better than that of last year.

have little doubt that the crop was in fact a full 16-anna one

The figure in column 7 has not been altered, as nothing has transpired since the submission of the first forecast. The acreage under wheat (79,000 acres) returned in the preliminary forecast is very high. Manbhum is not a wheat-producing district, and a small area only is sown with wheat During his last cold weather tour, Mr. Windsor, Officiating Deputy Commissioner, noticed this, and accordingly the acreage was reduced in submitting the estimate of *rabi* food-grains. When compared with the neighbouring districts of Bankura, Burdwan, Birbhum, Lohardaga and Hazaribagh, it will be seen that the Manbhum figures were too high, higher than that of Muzaffarpur and Champaran, which are wheat-producing districts. The acreage has therefore been reduced from 79,000 to 8,000 acres.

Since the submission of the preliminary forecast, the Sub-divisional Officer of Ranchat has, after enquiry, increased the estimated outturn for his sub-division, while the Sub-divisional Officer of Kushtia has reduced it The district average, *i.e.*, 10 annas shown in the preliminary estimate, however remains unaltered Want of rain at the end of January and in February last much affected the outturn.

The former estimates were questioned by this Department in 1893 and 1893.

Abstract of the information regarding the prices and general condition of stocks of the supply of food-grains in the Province for 1894-95 *as furnished by District Officers.* (*Circulars dated 7th and 14th March* 1883, *from the Revenue and Agricultural Department, India.*)

District.	Cause of extension of wheat cultivation in recent years.	Whether the produce of the year's supply of food-grains has been much above or much below the average.	Whether the food-stocks of former harvests are plentiful or not.	Whether the prices of food-grains generally have ruled higher or lower than usual.	What have been the causes of increase or decrease of exports of wheat, and how far has the movement been influenced by a scarcity or otherwise of food-grains.	Remarks by the Agricultural Department.
Burdwan .	.....	The produce of the year's supply of food-grains has been an average one in the Sadar sub-division and above the average in Kalna, Katwa and Raniganj sub-divisions.	The food-stocks of former harvests are reported not to be plentiful in the Sadar, Kalna and Katwa sub-divisions, but fairly plentiful in Raniganj sub-division.	The prices of food-grains generally have been normal in the Sadar and Kalna sub-divisions, but have generally ruled higher in the Katwa sub-division, while in Raniganj they have ruled lower than in 1892-93 but higher than in 1891.	Very little wheat is cultivated in this district, and what is cultivated is for home consumption and not for export.	
Bankura ...	...	Rice is the principal food-grain here. *Bhadoi* rice, which is grown on river sides and high lands, produced a 14-anna crop for want of sufficient rainfall in March to May, and for superabundent rainfall and high floods in subsequent months. Winterrice on which the bulk of the population depend produced an 18-anna crop due to favourable weather.	Fairly plentiful throughout the whole district. The Sub-divisional Officer of Vishnupur reports that the good crops of the last two years successively have not been able to restore things to their normal condition in thana Sonamukhi where there had been failure of crops successively for three years previous to 1893-94, and in consequence the circumstances of the different sections of the community have been much straitened.	There was a fall in the rice market throughout the year as compared with the rates of the two previous years. The rate per rupee rose from 18 seers to 20 seers 10 chitaks in 1894-95 against 11 seers 8 chitaks to 17 seers in 1893-94, and 17 seers 8 chitaks to 11 seers 12 chitaks in 1892-93.	Wheat is very sparingly grown in this district and it is not a staple food-grain here. It is consumed locally. The little wheat produced here was largely supplemented by importation from the North-West to meet the local demand.	
Birbhum ...	.....	The produce of this year's supply of food-grains (chiefly rice) has been above the average.	Plentiful.	Slighty lower than in the previous two years, but higher than the average of the three years preceding 1892-93.	Wheat is grown in this district in a very limited area and is not exported.	
Midnapore ...	.....	Above the average, except in limited areas where it was injured by floods.	Except at the Sadar the food-stocks of former harvests are not plentiful.	Lower than usual	.....	
Hooghly ...	.....	Above the normal, owing to the favourable rains in November.	Not very plentiful owing to the large export, but probably higher than for some years	Lower than usual on account of good outturn this year.	.....	
Howrah ...	.....	In one station above and in other two below the average.	Not plentiful. The local produce is not sufficient to meet the whole year's requirements.	Lower than in last year ...	.....

Khulna ...	... ...	Above the average	Not plentiful	Ditto	.....	
Nadia ...	.....	Below the average	Ditto	Ditto	Wheat is exported in very small quantity from this district, and there has been no appreciable increase or decrease in its exports during 1894-95.	
Jessore ...	.....	The produce of this year's supply of food-grains was 17 annas.	Ditto	Ditto	.....	
Murshidabad...	.....	Slightly below the average	Ditto	Higher than usual	There has not been any perceptible increase or decrease in the export of wheat.	
Dinajpur ...	.....	Below the average owing to unsatisfactory outturn of winter rice.	Not plentiful among the lower classes but ample with the higher classes.	Gradually getting lower owing to diminution of exports.	.....	
Rajshahi ...	.....	Fully an average one. The produce of rice has been more than average.	Not plentiful	Lower than in last year ...	The export of wheat in 1894 was 2,092 maunds against 25,264 maunds in 1893 and 24,754½ maunds in 1892.	
Rangpur ...	.....	Below the average	Plentiful except at Kurigram to meet the local demands.	Higher	There is no export of wheat from this district.	
Bogra ...	.....	The outturn of the *aus* crop was 8 annas against 10 annas of the previous year, but that of the *aman* crop was only about 10 against 18 annas of the year before. This bad result was due to deficient rainfall. Of the *rabi* crops, the pulses have been 10 annas against 16 annas of the previous year. On the whole, it would appear that, owing to deficient outturn of the *aman* rice which is the staple food crop of the district, the produce of the year's supply of food-grains was much below the average.	Scanty, a large quantity of the stock being usually sold and exported to other districts.	Not higher than usual. The prices of wheat, rice (common) and gram in 1894-95 were 13 seers 15¼ chitaks, 14 seers 5¼ chitaks, and 12 seers 9¼ chitaks, against 12 seers 11¼ chitaks, 13 seers 3¼ chitaks, and 14 seers 10¼ chitaks in 1893-94, and against an average of last five years of 12 seers 15$\frac{11}{16}$ chitaks, 14 seers 6¼ chitaks, and 14 seers 2$\frac{13}{16}$ chitaks respectively.	.....	

Pabna ...	.....	About the average, with the exception of rabi crops and pulses. The outturn of the latter crop has been below the average owing to want of seasonable rain.	Not plentiful	Much the same as usual excepting pulses, which have been selling at considerably higher prices than usual owing to deficient supply.	There is practically no export of wheat from this district.
Darjeeling ...	.....	Average	The agricultural operations of this district are mainly confined to tea cultivation. The district depends to a large extent on the plains for its supply of food-grains. The supplies in the markets were sufficient during the year under report.	Not higher than usual ...	Wheat is grown only in the hills to a limited extent for local consumption. It is not exported.
Jalpaiguri ...	.....	Average	Plentiful	Lower than those of the last two preceding years.	.....
Dacca ...	.....	Above the average	Not plentiful	Higher than usual at first, but lower since class was harvested.	.....
Faridpur ...	.....	A little above the average	There was scarcity in most parts of the district; hence there were no food-stocks of former harvests.	The price of rice, which is the staple food-grain in the district, is normal this year, but the prices of pulses have generally ruled higher.	The wheat cultivation in this district is not very extensive. The produce is consumed locally.
Backergunge ...	.....	Above the average, the outturn of winter rice, the chief staple of the district, being 16 annas.	Not plentiful in some parts of the district. The stock was drained elsewhere by the prevalent high prices, and the quantity held over was small.	Higher than usual up to November last, but since December the price has fallen a good deal. Rice is now sold at about Rs. 2-10 per maund, and this price is expected to continue till the next harvest. The usual price is Rs. 3 per maund.	.....
Mymensingh ...	.....	About or a little above the average ...	Not plentiful except in the Jamalpur sub-division.	Up to October 1894 very high. Since November last lower than the average prices of the last two years.	.....
Tippera ...	.....	Much above the average, the outturn being fully 19 annas this year.	Abundant, but are derived from the harvest of the year.	Lower than usual	.....
Noakhali ...	.....	Above the average	Plentiful	Ditto	.....

What have been the causes of increase or decrease of exports of wheat, and how far has the movement been influenced by a scarcity or otherwise of food-grains.	Remarks by the Agricultural Department.
Chittagong ...	..	Much above the average	Small, as is usual in this district, much grain being exported.	Lower, owing to the abundance of the harvest.	....	
Patna ...	.....	Above the average except in Barh, where the produce of supply of food-grains was normal.	Plentiful except in Barh	The prices of food grains have shown no variation in Sadar and Dinapore sub-divisions In Bihar they have ruled lower than usual and have been lower than the preceding year in Barh.	The increase or decrease in the export of wheat is said not to have been marked in Sadar and Bihar sub-divisions. It was inconsiderable in Barh No increase or decrease in Dinapore at all.	
Gaya ...	... ..	Slightly below the average. The *bhadoi* and the *rabi* crops were considerably below the average, but the main crop of the year, the winter rice crop, was above it.	The food-stocks of former harvests are not plentiful.	The prices of food grains generally have ruled much about the normal, if anything slightly below it.	The export of wheat during 1894-95 appears to have been the same as during 1893-94. There were no signs of scarcity during the year under review.	
Shahabad ..	... .	The produce of the north-western part of the district was about an average, that of the south-western portion is reported to have been above the average.	Sufficient for requirements ...	Lower in Buxar and Sasaram, stationary at Bhabua and Arrah The prices of mustard and oilseeds ruled higher than last year owing to their bad harvests.	The export of wheat during the year has decreased on account of the scanty harvests of the preceding year and on account of late sowing owing to unusual rain during the past year. No movement was, however, caused by the scarcity of food-grains or otherwise.	
Darbhanga ...	.....	A little below the average. During the year, the *bhadoi* crops yielded an outturn of 16 annas in the Sadar subdivision, 14 annas in Samastipur and 12 annas in Madhubani, or 14 annas for the whole district. Rice was 16 annas throughout the district. The average outturn of *rabi* for the whole district has been estimated at 16 annas	Not generally plentiful, and this is probably due to abnormal rainfall and floods, which injuriously affected the *bhadoi* and winter rice crops.	The prices of common rice and *marua* have ruled lower than in the preceding year Those of *gram*, wheat and *rahar* were, however, throughout the year higher than in the previous year.	The cultivation of wheat is not largely carried on in the district, and the produce is generally consumed locally. Its export is not carried on to any appreciable extent.	

Muzaffarpur ...	.....	Not much below the average. The outturn of the crops of 1894-95 was *bhadoi* 13 annas, winter rice 14 annas, and *rabi* 16 annas, or on the whole about 14 annas, against 10 annas in the preceding year.	Plentiful and more than sufficient to meet the requirements of the district.	Lower than in 1893-94, and not higher than usual.	There was as usual little or no exportation of wheat from this district during the year under report.
Saran	.....	Below the average	Plentiful	Higher than last year ...	Very little wheat is exported from this district.
Champaran ..	.....	Above the average	Not plentiful	Lower than in the two preceding years.	There has been no marked increase or decrease of export of wheat this year.
Monghyr ...	... ..	Average in the Sadar, below the average in the Begusarai, and much above the average in the Jamui subdivision.	Not plentiful in the Sadar	Lower than usual, lower on the whole in Jamui, but stationary in Begusarai.	Normal in the Sadar, generally increased in Jamui, and unchanged in Begusarai.
Bhagalpur ..	.....	Decidedly above the average	Plentiful in the north of the district and rather depleted elsewhere.	Lower than usual	There has been an increase of export of wheat in the north due to improved railway communication and good harvests. The staple food is rice and *marua*, and the movement did not affect it in any way. There has also been an immense export of wheat and rice from the south, including Sonthal Parganas.
Purnea	... ..	Paddy, the principal food-grain of the district, gave an average outturn; *bhadoi* rice 16 annas and winter rice 16¼ annas, other food-grains also gave an yield a little below the average.	Plentiful, as will appear from the low prices now ruling in the market, as compared with the preceding two years.	Ditto	Wheat is not extensively grown in the district, so that there never was any large export. The stocks in the hands of the cultivators, consequent on the fair harvests of the current and the preceding years, were more than what was required for their home consumption, and thus there was a small increase in the export of wheat during the current year.

Malda	.....	Average	Plentiful	Higher than usual	During the year under report, the export of wheat was on the decrease on account of its high price.	
Sonthal Parganas.	.....	Average in Dumka and Jamtara sub-divisions. In Deohar sub-division, the outturn of winter rice has been average and that of *bhadoi* and *rabi* below the average; in Godda and Pakaur, it has been below and in Rajmahal above the average.	Not plentiful	Much as usual	The export of wheat was large at Godda, less than usual in Rajmahal and normal at Pakaur. Elsewhere there were no exports or imports to speak of.	
Cuttack ...	.....	Below the average. Winter rice 13 annas, *bhadoi* rice 11 annas, wheat 12 annas, barley 12 annas, summer rice 15 annas, gram 12 annas, and other *rabi* pulses 14 annas. There would have been a bumper crop of winter rice during the year had not the very high flood of July last done much damage to the crop.	Not plentiful. Winter rice 11 annas, *bhadoi* rice 10 annas, wheat 10 annas barley 10 annas, summer rice 14 annas, gram 10 annas, and other *rabi* pulses 10 annas. During the first-half of the year 1894-95, there was much scarcity and the people suffered much till the crops were reaped. This will show that the stocks at the beginning of the year after considerable exportation as usual, were not sufficient for a year's consumption.	Higher than usual during first-half of the year. Rice is the staple-food of the district. The average price at which common rice was sold during each month of the year is shown below:—

Palamau ...	.....	Below the average	Fairly plentiful	The prices have not varied to any appreciable extent.	There appears to have been no variation in the export of wheat from this district.	To the belief of the Deputy Commissioner, the produce of the year's supply of food-grains has been decidedly above the average. The *bhadoi* only was a short crop, while winter rice and *rabi* crops were much above the average.
Manbhum ...	.....	The produce of the year's supply of food-grains is given below — Annas. Winter rice ... 16 Bhadoi ... Paddy ... ... 12 Maize ... ... 8 Millets ... ... 8 Pulses ... ... 12 Rabi ... It is evident that the present year's outturn of each of the crops was more or less above the average of last year. The rice crop was 16 annas almost all round, and in some places 18 annas.	The food-stocks of former harvests cannot be said to be plentiful. The outturn of crops in 1893-94 (except rice) was not very favourable, and consequently the poorer classes suffered a little, though there was nothing like scarcity or famine. The harvest of the year just passed has been generally good, and in some places the cultivators reaped two years' harvest. Owing to heavy rains, the maize crop, which is one of the staple food-grains in the district, suffered a great deal.	Lower than last year. Exportation of rice was much less this year, and the prices are therefore easier now.	Manbhum is not a wheat-producing district. What it does produce is consumed locally, and no portion of it is exported to any other district.	
Singhbhum ...	.....	Fair; about an average	Plentiful	Higher than usual	Wheat is not exported from this district to any appreciable extent.	

REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF 1894-95.

No. 390B., dated Calcutta, the 11th May 1895.

SALT.

THE HON'BLE MR. D. R. LYALL, C.S.I.

2. The quantity of salt of every description cleared during the quarter under report amounted to 24,97,442 maunds against 24,25,443 maunds in the previous quarter and 27,29,108 maunds in the corresponding quarter of the previous year; and the amount of net duty levied thereon was Rs. 58,07,558 against Rs. 56,96,284 in the previous quarter and Rs. 63,17,446 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of locally-made salt removed from the golas in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I:—

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

CALCUTTA, *the 21st May* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 18TH OF MAY 1895.

At the beginning of the week the pressure distribution was almost normal, and a light circulation of winds, such as prevails in the middle of May, obtained. The general direction was southerly in Lower Bengal and easterly in the northern districts. Temperature, however, was considerably above the normal in the northern and central districts, and almost normal in Chota Nagpur and part of Orissa. Throughout the week there has been a steady downward tendency of pressure; but as these changes have been fairly uniform, the distribution over the province has undergone but little modification. The changes over the Bay have been of greater importance, and by the end of the week led to steep gradients and strong westerly winds over the southern part between Ceylon and Burmah. Owing to the light nature of the wind circulation, the slight variations of the pressure distribution were followed by occasional changes in the wind directions from south-west to south-east, and gave rise to local storms, more especially in the western districts. These storms occurred generally about the 12th and 13th, and again between the 15th and 17th except in North Bengal and Cachar, where rainfall was more frequent and heavy. The weather being generally settled and the sky free from clouds during the day, high temperature has prevailed. There was moderate defect in Orissa, Chota Nagpur, and part of Bihar in the early part of the week when local storms were occurring in these districts, but elsewhere excess of rather variable amounts continued from day to day during the week, the maximum difference from the normal being very rarely more than 5°. Thus the weather of the week has been characterised by falling pressure, increasing temperature, and almost normal rainfall in the western and central districts. In East Bengal and North Bengal the rainfall distribution is abnormal in there being considerably less than the usual amount in East Bengal and considerably more in North Bengal.

Pressure.—As stated above, pressure was nearly normal at the beginning of the week, there being excess of less than ·05 inch. A moderately quick fall was then general, the change diminishing towards the south. This continued during the first half of the week, after which there was a slow rise for two days, but the fall began again on the 17th and continued till the end of the week. Readings were about a fifth of an inch lower at the end of the week than at the beginning; but as the change had been uniform over Bengal and the north of the Bay, the distribution in these parts was practically the same. In the south of the Bay gradients were much steeper. The mean pressure for the week is below the normal everywhere by amounts varying between ·06 inch and ·08 inch.

Temperature has been high, except in the south-western districts in the early part of the week. The highest temperature recorded in Bihar was 108°, and in South-West Bengal, Orissa, and Chota Nagpur between 104° and 105°. These high readings occurred on the 18th, the last day of the week. Mean temperature is practically normal in Orissa and Chota Nagpur, and above in the other districts by 2° in East Bengal and Bihar, 1°·6 in South-West Bengal, 3° in North Bengal, and nearly 4° in Assam.

Rainfall.—Scattered showers have fallen in all districts, more frequently on the 12th and 13th and on the 15th and 16th. In the Jalpaiguri, Darjeeling, and Cooch Bihar districts of North Bengal rain has fallen almost daily. The average fall has been very uniform, and is about ·7 inch except in North Bengal, where it is 2·08 inches. South-West Bengal and East Bengal have received less than the normal fall, and the other districts more, especially North Bengal, where excess is ·7 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 18th of May 1895 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; t, thunder; ≤, lightning; d, drizzling rain.

NOTIFICATION—No. 3324A.

The 28th May 1895.—The following revised rules for the conduct of the departmental examinations, held under the direction and control of the Central Examination Committee, having been sanctioned by the Lieutenant-Governor and approved by the Government of India, are hereby published for general information:—

Section 1.—*General.*

1. These rules shall apply to the departmental examinations of the junior members of the Indian Civil Service, the Executive Branch of the Provincial Civil Service, Subordinate Civil Service, Police, Opium, Forest and other Departments of the Public Service to whom they may from time to time be made applicable.

2. All Assistant Magistrates, Deputy Magistrates and Collectors, Special Deputy Collectors, Sub-Deputy Collectors who, on the 4th July 1892, had not been confirmed in their appointments (*vide* Appendix XII), Assistant Superintendents of Police, and others (to whom these rules may be applicable), who may have been more than six months on duty, shall, and those who have been less than six months on duty, may, at their option, be subjected to half-yearly departmental examinations, and shall be required to pass according to the standard, or the standards, of examination which may be applicable to them respectively in each subject, according to the rules hereinafter set forth.

3. To direct and control these (half-yearly) departmental examinations, there shall be a Central Examination Committee appointed by Government. It shall consist of a President and of as many members (of whom one shall be Secretary) as the Government may think proper to appoint from time to time.

4. The examinations will be held, in the Regulation Provinces, at any station which is the head-quarters of a Divisional Commissioner, or where there is a District Judge. They may also, with the previous consent of the Central Examination Committee, be held at any station where there is a Deputy Commissioner.

5. Each Divisional Commissioner shall notify in the *Calcutta Gazette*, at least one month before the date of examination, at what stations in his Division examinations are to be held, and shall report to the Chief Secretary to the Government of Bengal the names of intending examinees, specifying at which centre of examination each is to attend. If a Divisional Commissioner has only a very few examinees, and if the means of locomotion are easy, he will probably have only one or two centres of examination in his Division. Heads of Departments will, in the same way, notify to the Chief Secretary the names of intending examinees in their respective departments, specifying at which centre each is to attend.

6. The Government, after collecting all the lists, will prepare a complete list of all officers liable to appear at the examination, and forward a general list to the Secretary to the Central Examination Committee at least three weeks before the examination, and extracts to the Presidents of the Local Committees.

7. The Central Examination Committee may, on sufficient cause being shown, permit the appearance of an officer for examination at a station other than that at which, under ordinary circumstances, he would be required to present himself.

8. Local Committees shall be formed at the several stations at which examinations are to be held, and they shall conduct the examinations under the instructions of the Central Committee.

9. The Local Committee at each station, which is the head-quarters of a Commissioner, shall consist of the Commissioner, the Collector (or Deputy Commissioner), and a native civil officer to be selected by the Commissioner. In the absence of the Commissioner, the Judge (or Judicial Commissioner) shall take his place on the Committee. At the other stations the Committee shall consist of the Judge, the Collector, and a native officer to be selected by the Judge. In the event of the Collector being unavoidably prevented from attending for reasons to be submitted to the President of the Local Committee in writing, the Commissioner or Judge may appoint a Deputy Magistrate or other native civil officer to take the Collector's place on the Committee. At the stations in the Non-Regulation Provinces which are not the head-quarters of the Commissioner, the Deputy Commissioner shall form a Committee, with one or two other officers to be selected by him.

10. The Government will, in communication with the Central Committee, fix the dates for the half-yearly examination, which shall be the same for every district. The first half-yearly examination will usually be held in the month of April or May, and the second in the month of October or November.

11. It shall be the duty of the Central Committee to prepare, previous to each half-yearly examination, sets of questions to be put to the examinees, to forward a sufficient number of copies of each of such sets to the President of each Local Committee in a sealed packet, to determine the order in which the examination in each paper and subject shall be held, and to arrange all other details for the conduct of the examinations. The time fixed for each paper shall be notified in the *Calcutta Gazette*. The Central Committee shall from time to time lay down such rules as may appear to them best for the guidance of the Local Committees, in order to ensure a fair and uniform method of ascertaining the proficiency of the examinee in each subject.

12. The sealed packet of papers shall remain in the custody of the President of the Local Examination Committee, who shall not open it until the time of examination. The Committee shall superintend the written examination of the examinees only so far as may be necessary to ensure its being conducted with proper strictness; they shall not examine the written answers, but shall forward them to the Central Committee with a statement specifying the marks which they assign to candidates for conversational proficiency in the vernacular, in which branch their decision shall be final. They shall further, in the case of the members of the Indian Civil Service, the Executive Branch of the Provincial Civil Service, the Subordinate Civil Service, and the Police Department, forward a report which shall be furnished by District Officers and Commissioners under whom the examinees have been employed, respecting their official character, qualifications, and the work done by them during the preceding six months.

13. The Central Committee, after perusing the reports and the examination papers, shall report to Government the names of such officers as, in their opinion, have passed, noticing specially, in the order of their merit, those who may have passed with distinction. They shall also report the names of those officers who have succeeded in some of the subjects only.

Section II.—Officers of the Indian Civil Service, the Executive Branch of the Provincial Civil Service, and Subordinate Civil Service.

14. There shall be two standards of examination in Law, Treasury and Local Fund Accounts, and Languages,—the Lower and the Higher Standards. With the exceptions specified below, officers are required to pass in Law, Accounts and in the language of the district by both the Higher and the Lower Standards, and in a second language by the Higher Standard only.

15. In Appendix V will be found the rules prescribing the tests in the vernacular which officers are required to satisfy.

16. The object of the Lower Standard of examination in Law shall be to test the examinee's practical acquaintance with the Criminal Codes, and his general knowledge of certain of the more important local laws, regulations and rules One paper shall be prepared specially for this examination, which shall be confined to the Criminal Codes. The use of only Codes as issued by the Legislative Department, shall be allowed for this paper. The questions must not be such as can be answered by copying a passage from a book; but they must be such as shall thoroughly test the capacity of the examinees to understand the bearing of facts, and to ascertain the law and apply it. Another paper shall be prepared consisting of questions on the local laws, regulations and rules enumerated in Appendix I. These must be answered without the aid of books. This paper is designed equally for the candidates for examination by the Lower and Higher Standards, but the number of pass marks shall be less in the case of examinees by the Lower than in that of those by the Higher Standard of examination.

17. In the examination by the Higher Standard, it is necessary for the examinee to pass, under the rules referred to above in two vernacular languages—ordinarily Bengali and Hindustani. All examinees will be required to pass in Law in two papers. The nature of the one, in answering the questions in which the use of books will not be allowed, has already been explained in paragraph 16. The other paper, for which the use of books will be allowed, will contain questions on the local laws, regulations and rules, set forth in Appendix II. Only unannotated editions of Acts or Codes and Manuals issued by authority will be allowed in answering this paper. The questions should be confined as much as possible to cases commonly arising in the ordinary routine of the office of a Magistrate and Collector. Certain facts of probable occurrence in real practice should be stated, and the examinee required to find and apply the law applicable to the facts.

18. In Accounts there will be two Standards of examination,—the Lower and the Higher. The scope of the questions at the former will be somewhat elementary, but candidates at the latter will be required to exhibit a satisfactory general acquaintance with the whole system of provincial accounts. The examination will be with the aid of books, a list of which is given in Appendix III.

19. An officer of the Indian Civil Service must pass the examination in Law, in Accounts, and in both languages by the Higher Standard. He will be required to pass by the Lower Standard only in Accounts and in the vernacular of the district in which he is serving.

20. Officers who, after passing in the higher grade the examination for admission into the Subordinate Executive Service held in 1873 or subsequently, have received appointments in that service, will be subject to no further examination except the Higher Standard departmental examination. Candidates who passed at the Subordinate Executive Service examination which was held in 1872 are exempted from examination by the Lower Standard in the vernacular only. They will be required to pass in Law and in Accounts by that standard.

21. Officers (except those whose cases are provided for by rule 20), who obtained appointments in the Subordinate Executive Service after passing the competitive examinations held in 1884 and in subsequent years, and all who may similarly obtain them in future, will be required to pass the departmental examinations by both standards.

22. An officer of the Indian Civil Service is permitted to present himself for examination by both the Higher and Lower Standards at the same time. If he passes in either of the papers, he will be held to qualify for the Lower Standard, but passing marks should be

obtained in both sets of papers to qualify for the Higher Standard. No other officer shall be permitted to take up any of the subjects by the Higher Standard examination until he shall have completely passed in such subject by the Lower Standard.

23. An officer, who succeeds in passing by either standard (*a*)in Law, (*b*) in Accounts, or (*c*) in either of the languages, shall not again be required to present himself for examination by the same standard in the subject in which he was successful, but only in those in which he failed.

24. The marks to be assigned to each branch of the examination in Law and examination in Accounts, the proportion required for passing by the different standards, and the time allowed for each paper, are set forth in Appendix IV. The same information as regards the examination in Languages will be found in Appendix V. Uniformity must be rigidly enforced in the time allowed for each subject, whether in Law, Accounts or Language.

25. An officer who has passed according to the Lower Standard of examination, and who has exercised the powers of a Magistrate of the third class for six months, shall usually be vested with the powers of a Magistrate of the second class, described in sections 32, 33, 35, and 36 of the Code of Criminal Procedure (Act X of 1882), provided he is certified by the Commissioner to be fully competent to exercise them. Assistant Magistrates will also then be vested with the powers of a Deputy Collector.

26. An officer, however, who shall have passed by the Lower Standard in the Criminal Codes, accounts, and in the language of his district, may on the Commissioner's recommendation be vested with the powers of a Magistrate of the second class, provided he has had not less than six months' experience in his magisterial duties.

27. An officer who has passed according to the Higher Standard shall be eligible to be vested with the powers of a Magistrate of the first class, but not until he shall have exercised the powers of a Magistrate of the second class for at least six months.

28. An officer, who has passed in law and in the language of his district according to the Higher Standard, may also be vested with the powers of a Magistrate of the first class, subject to the condition of his having exercised the powers of a Magistrate of the second class for six months; but he shall not be entitled to any promotion or increase of pay until he has passed fully by the second standard. He shall exercise the powers of a Magistrate of the first class so long only as he is employed in a district where the language in which he has passed is the vernacular.

29. Assistant Magistrates being members of the Indian Civil Service, on first appointment, draw only Rs. 400 a month. On passing the Lower Standard of examination and being invested with the powers of a Magistrate of the second class, they shall be allowed an increase of Rs. 50 a month, provided they have exercised the powers of a Magistrate of the third class for six months at least; and on passing fully the Higher Standard, and being invested with the powers of a Magistrate of the first class, they will receive a second increase of Rs. 50, provided they have also exercised the powers of a Magistrate of the second class for not less than six months.

30. It is the duty of district officers to look to the practical training of the young officers placed under them from their first entering into official life till they acquire a practical experience of their work and qualify themselves for the exercise of higher powers by passing the prescribed examinations. District officers are expected to take active interest in the well-being of the young men placed under them, by exercising due supervision over their studies, by holding periodical examinations to test their qualifications and official knowledge, and by any other means which may seem to them to be expedient for the purpose. They will be careful to see that the young officers subordinate to them are afforded opportunities, whenever possible, of learning Treasury work (*vide* Appendix XI).

Section III.—Police officers.

31. There shall be two standards of examination in Law and Languages,—the Lower and the Higher Standard. As regards the examination in Languages, rules 15 and 22 above shall apply to Police officers. The same papers in Languages will be set for Police officers as for the officers to whom the rules in section II apply. For the Lower Standard in Law, questions shall be set from the Penal Code, the Code of Criminal Procedure, Act V of 1861, the Village Chaukidari Act, VI (B.C.) of 1870, or any Act amending it, in force at the time of examination, Act I (B.C.) of 1871, Act I of 1886, and Chapters IV, VIII, XV, and XVI of the Police Manual. The use of books will be allowed in answering these questions: only unannotated Codes, or Acts issued by authority, and the Police Manual may be used. For the Higher Standard the questions will be taken from the same Acts, from any part of the Police Manual, from all the Circulars of the Police Department, from the Excise, Salt and Opium Laws, from Act III (B.C.) of 1884 (so far as it relates to Police), and from the Evidence Act I of 1872, Act IV of 1884 (Explosives), Act II (B.C.) of 1889 (Fisheries), Act II (B.C.) of 1867 (Gambling), Act IV of 1879 (Railway), Act IX of 1890 (Railway) Act I of 1882, sections 172, 173 (Emigration), Act XI of 1890 (Cruelty to Animals), Act XXVII of 1871 (Criminal Tribes), and all amending Acts. In this examination the use of books will not be allowed. No officer will be permitted to take up Law by the Higher Standard until he has passed in that subject by the Lower Standard.

The marks to be assigned to the examination in Law, the proportion required for passing by the different standards, and the time allowed for each paper, are set forth in Appendix IV. The same information as regards the examination in Languages will be found in Appendix V.

32. Police Officers transferred to the Executive Service, or who desire such transfer, will be required to satisfy the same tests as those prescribed above for officers of the Executive Branch of the Provincial Civil Service, subject to the exception noted below.

33. When such an officer has already passed by either standard in a language, the pass will be accepted as sufficient to that degree.

34. Any officer so transferred who has passed in Law by the Lower Standard (as hitherto required for the Police) will be required to pass for the Lower Standard in the general papers of local laws, etc. He will be exempted from examinaton in the Criminal Codes prescribed for the Lower Standard if he so desire; but if he elects to pass, such pass will be taken into account in his favour.

35. Such officers who have passed by the Higher Police Standard in Law will still be required to pass in both law papers prescribed in paragraph 17 above, the term "law" including Revenue and General law.

Section IV.—Officers of other Departments to whom these Rules have been made applicable.

36. Officers of the Opium Department will be examined, after admission to the Department, in the subjects mentioned in Government orders No. 1157G. of 28th October 1872, as amended by Government orders No. 2504-Opium, dated the 17th July 1893, to the address of the Secretary, Board of Revenue, particulars of which are stated in Appendix VII.

37. Forest officers will be examined, after admission to the Department, in the subjects mentioned in sections 72, 73, 74, 76, 77 and 78 and Appendix V of the Forest Department Code, 4th-edition particulars of which are stated in Appendix VIII.

38. The rules regulating the Departmental Examination of Cantonment Magistrates are contained in Appendix IX.

39. Officers of the Public Works Department will after admission to the Department, be examined in Law, once a year in April or May, as directed in Government Resolution No. 44T.E., dated the 31st May 1894, which is printed in Appendix X.

40. For the examination of Officers in *cases*, a case not being of special difficulty should be selected by the President of the Local Examination Committee. In selecting a case it should be remembered that Officers will only exercise magisterial powers under Act III (B.C.) of 1876 (Bengal Irrigation Act). The local Committees will merely state their opinion on the merits of each candidate's judgment and *not transmit* this part of the proceedings. The case selected shall be in the Court vernacular of the district in which the examination is held.

Section V.—Miscellaneous.

41. Officers attending these examinations will be allowed travelling allowance, subjec to the rules laid down in Section IV, Chapter L, of the Civil Service Regulations.

42. No application, from any junior officer liable to examination, for privilege leave or leave on private affairs, will be entertained if the following half-yearly examination takes place before the expiry of the leave applied for, unless the application specifies that the applicant will attend the examination.

43. If such leave is applied for, and the application from such an officer is submitted to Government, it should be stated that he is liable to pass an examination, and that the next examination will be held within the period of the leave applied for. This will enable the Lieutenant-Governor to decide whether, for the reasons stated, the leave should be granted; and, if so, on what conditions.

Rules for the examination of Civil Officers in the Lower Provinces of Bengal in the Vernaculars.

The following rules for the examination of civil officers in the Lower Provinces of Bengal apply to all officers of the classes specified in them, and to such others as the Local Government may from time to time direct. They do not affect the rules for the encouragement of the study of the languages of frontier tribes, a copy of which is given in Appendix VI.

Officers to whom the rules apply.

2. Two grades of examination are recognised:—

(I) The Higher Standard of examination for civil officers, held under the direction and control of the Central Examination Committee.

(II) The Lower Standard of examination for civil officers held under the direction and control of the Central Examination Committee.

3. Officers of the Public Works, Education, and Survey Departments are examined under special rules. In their case the standard specified in grade II will be accepted as sufficient, should they exceptionally have to be examined along with the officers attached to the general administration.

Officers of the Survey, Education, and Public Works Departments.

4. No native member of the Executive Branch of the Provincial Civil Service and the Subordinate Civil Service is liable to examination in a language which is his own vernacular.

Officers of the Executive Branch of the Provincial Civil Service and the Subordinate Civil Service.

Subject to the above proviso—

(i) All members of the above services are required to pass by the Higher and Lower Standards in the vernacular of the district in which they may be serving.

(ii) After so passing, if transferred to a district with a different vernacular, they will be required to pass in that vernacular by the higher standard only within two years of their arrival in the district. During this period they will, if otherwise qualified, be considered as eligible for promotion, but after the expiry of the two years they will, as long as they remain in the district, receive no promotion until they pass in the second language.

* For the lower standard of examination, candidates are required to pass in the following chapters of Volume I of the Civil Account Code only, *viz*, Chapters 1, 3 to 6, 9, 13, 15, 16, 18, 19 to 21, 29 to 31, and Appendix K.

(iii) If, after passing in the second language referred to above, they are again transferred to a district where there is a third vernacular, they will be required to pass in that vernacular also by the Higher Standard only within two years* of their arrival in the district. During this period they will, if otherwise qualified, be considered as eligible for promotion, but after the expiry of the two years they will, as long as they remain in the district, receive no promotion until they pass in the third language.

Officers passing in a third language under this rule will be entitled to a reward of Rs. 180.

Special rules for medical officers.

5. Medical officers in civil employ, if they have not already passed by the Military Higher or Lower Standard, will be required to pass in the language of the district by the standard specified in grade II.

6. Medical officers in civil employ, who have passed in one language under the above rules, if posted to a district where another language is the vernacular, will be required also to pass in it, but only by a conversational test designed to prove their ability to converse with the people and be understood by them.

No native medical officer shall be liable to examination in a language which is his own vernacular.

Officers required to pass in two languages:—
1. Indian Civil Servants.
2. Assistant Superintendents of Police.

7. The officers named in the margin are required to pass by the standard specified in grade I above in two languages, of which Hindustani is one and Bengali the other. In the case of officers employed in Orissa, the two languages will be Hindustani and Uriya.

Order in which the languages must be taken up.

8. Officers generally are required, in the first instance, to pass in the language of the district in which they are serving by the Lower Standard specified in grade II above, before attempting a second language, in which passing by the Higher Standard only will be required.

Officers exempt from the Lower Standard of Examination.

9. Uncovenanted officers, who have passed in any vernacular at the Native Civil Service Examination, are not required to pass in it again by the Lower Standard of departmental examinations, but may go up for the Higher Standard in cases where they become liable to this examination.

10. An officer liable to pass in two languages when he has passed in the language of the district by the Lower Standard, as required in rule 8 above, may present himself for examination by the Higher Standard in that language and in the second language, which will be Hindustani in the case of those who first qualify in Bengali or Uriya, and in the case of those who first pass in Hindustani, Bengali, or, if they be posted in Orissa, Uriya.

Cases in which a third language is compulsory.

11. Members of the Indian Civil Service and the Statutory Civil Service who are of less than 12 years' standing, and have passed in Hindustani and Bengali, will, on transfer to Orissa, as a condition of promotion to the substantive grade of Magistrate, be required to pass in Uriya as a third language. Similarly, those who have passed in Hindustani and Uriya only, will, on transfer to Bengal, be required to pass in Bengali as a third language. On passing in a third language under this rule, covenanted and statutory civilians become entitled to a reward of Rs. 500.

12. Assistant Superintendents of Police, who have passed in Hindustani and Bengali under rule 7 of Appendix V above, will on transfer to Orissa be liable to pass in Uriya as a third language, and unless they pass in it within two years* after their arrival there, they will not be considered eligible for promotion after that period until they have passed. On passing in Uriya they will be entitled to a reward of Rs. 180. Similarly, for those officers who have passed in Hindustani and Uriya, and are transferred to a Bengali-speaking district, Bengali will be a third language to be treated as above.

13. The examination specified in grade I above and the Lower Standard of examination specified in grade II above will be held under the rules for the conduct of the departmental examination of civil officers, and under the direction and control of the Central Examination Committee in Calcutta.

The following are the tests prescribed for the two grades of examinations:—

Grade I.—The Higher Standard of Departmental Examination.

A.—Reading current handwriting in the vernacular.†

A document of the more difficult description of office papers, selected and lithographed by the Central Examination Committee, shall be transliterated‡ into the Roman character according to the Hunterian or Wilsonian system. Special marks will be assigned for the correct use of this system.

B.—A written translation from the vernacular into English.

The same document shall also be translated into English correctly.

† The Hindustani paper will be in the Kaithi character for all officers except Opium Officers of the Benares Agency, for whom special rules have been prescribed (*vide* Appendix VII).

‡ For the rules for transliteration, see circular order No. 311, dated the 20th March 1894, issued by the Central Examination Committee.

An English judgment or other official document of a somewhat difficult nature, selected by the Central Examination Committee, shall be translated into the vernacular without assistance, and in a generally correct manner.

The examinee shall be tested in conversation with several natives in such a manner as to satisfy the local Committee of his power of making himself understood by them, and of explaining himself with clearness and sufficient propriety in the vernacular in an argument or topic of some difficulty, such as may occur in official business.

The maximum and the pass marks assigned to each branch of the examination, and the time allowed for the papers, are subjoined:—

For this examination the tests shall be the same as the above, but the papers shall be less difficult. The proportion of marks to be obtained in order to pass, and the time allowed for the papers, shall be the same as for the Higher Standard above described. The principal object of this examination shall be to test the proficiency for practical purposes of the examinee in such language.

14. No native officer (these rules notwithstanding) shall be liable to examination in a language which is his own vernacular. The Commissioners or Heads of Departments submitting the lists of intending examinees under rule 5 of the Rules will consider each case, and, on satisfying themselves, may exempt the candidate from examination in such language, reporting their reasons for doing so to Government.

15. No reward shall be paid to any native officer for passing in any language with which, from his birth or education, he is naturally familiar, or which is closely allied to his vernacular language. For the purposes of this rule Bengali and Uriya will be considered to be closely allied languages.

A second reward will in no case be given to an officer for proficiency in a second language of the same group. The examinations will be conducted under the orders of the Central Examination Committee, Calcutta, at the several local centres, as provided for in the foregoing examination rules. Special papers will, however, be prepared for Forest Officers, in which technical judicial terms will be avoided and such terms substituted as bear directly on forest work.

The examinations passed by Forest Officers in Hindustani by the Military standard in the other provinces or in Bengal, previous to the issue of these orders, will, however, hold good for the purposes of promotion.

3. The rules prescribed in Appendix V for the conduct of departmental examinations of other Civil Officers will, as far as practicable, be applicable to the examinations of Forest Officers.

4. Forest Officers will be allowed to present themselves for examination in any "principal" language of their province by both the Lower and the Higher Standards at the same time with the permission of the Conservator of Forests: an officer who passes in either of the papers will be held to have qualified for the Lower Standard, but passing marks must be obtained in both sets of papers to qualify for the Higher Standard.

A total of over 160 marks, gained on both the papers in the written and oral examinations together in any one of the three subjects will entitle the examinee to a certificate of having passed "with credit," in that subject, and a total of over 180 marks to a certificate of having passed "with great credit" *provided that* no examinee can be held to have passed "with credit" in any subject, if no marks are allotted for the answer to any one of the questions set in that subject either in the written or in the oral examination.

2. The examination in cases will be conducted as follows:—

The record of a case, such as ordinarily comes before a canal officer exercising magisterial powers, in which the evidence has been recorded in the vernacular, will be read out by a native official. Where possible, the case will be read to each candidate separately, or to small batches. The candidate must write his notes of evidence as the reading proceeds, as he would do were he actually trying the case. At the conclusion of the case the candidate, who may refer to his books, must write (Europeans in English, natives of India in Hindustani, Uriya, Bengali or English as they prefer) a judgment on the question or questions at issue, with a statement of reasons.

3. Officers will be allowed to pass separately in either of the papers A or B or in the case C. Passing marks in each subject will be 50 per cent.

The following table shows the particulars of marks assigned to each subject and the time allowed:—

APPENDIX XI.

Resolution of the Government of Bengal, in the Appointment Department, No. 4717A., dated the 15th December 1892.

READ—

The Resolution of Government, dated the 28th March 1882, on the subject of the training, selection and qualification of officers for charge of District Treasuries.

Read also—

The Resolution of Government, No. 3111A., dated the 4th July 1892, on the admission of Special Deputy Collectors and Sub-Deputy Collectors to the Departmental Examination of Junior Members of the Covenanted and Provincial Civil Services.

In paragraph 4 of the Resolution of the 28th March 1892, quoted in the preamble, it was declared to be the duty of Commissioners and District Officers to see that young officers, until they have passed the departmental examination by the Higher Standard, are allowed opportunities of gaining practical acquaintance with the duties of a Treasury Officer, and that they are placed for the purposes of training in charge of district treasuries under the general supervision of the Deputy Collector ordinarily in charge, or of some other competent officer on the spot, for a period of not less than six weeks or more than two months in each year, and it was also laid down that a certificate from the Collector of the district, that each officer in training has, under the above provisions, duly attended to and satisfactorily discharged the duties of Treasury Officer, should be indispensible to his being declared to have passed any departmental examination.

2. The orders contained in the Resolution of the 4th July 1892, under which Special Deputy Collectors and Sub-Deputy Collectors are required to pass the departmental examinations, have, however, so largely increased the number of officers liable to those examinations that a strict compliance with the above rules is no longer possible. The production of a certificate regarding treasury work will therefore not be an obligatory condition of the examination in future, and it will be considered sufficient if candidates are able to pass their examinations in treasury subjects. At the same time the Lieutenant-Governor is convinced of the importance of allowing to young officers in training sufficient opportunity of learning treasury work, and hopes that District Officers will be careful to see that Assistant Magistrates, Deputy Collectors, and Sub-Deputy Collectors under them are afforded such opportunities whenever possible.

APPENDIX XII.

Resolution No. 3111*A.*, *dated the* 4*th July* 1892, *regarding the admission of Special Deputy Collectors and Sub-Deputy Collectors to the Departmental Examinations.* (*Extract paragraphs* 7 *to* 9.)

* * * * * * *

7. In these circumstances, the Lieutenant-Governor considered it desirable to lay down as an inflexible rule that all Special Deputy Collectors shall be required to appear at the departmental examinations under the same conditions as Deputy Magistrates and Deputy Collectors of the Provincial Service. If they do not pass these examinations within the time prescribed from the date on which it is made compulsory on them to appear, they must be reduced to their permanent appointments as Sub-Deputies.

8. In regard to Sub-Deputy Collectors, also it is now laid down that they shall be required to appear at the examinations under similar conditions. In their case, however, the rule can only be enforced, in the first instance, with considerable exceptions. It cannot be applied to the senior officers of the service, who have reached an age when they cannot be expected to pass examinations. Nor would it be fair to extend the rule to officers who, at the date of the present orders, have been confirmed in their appointments. For such officers, therefore, the examinations will be optional. But it must be distinctly understood by all who are concerned that if they do not succeed in passing at least the Lower Standard of examination, they will not be eligible for promotion to the grade of Special Deputy Collector. It is optional for them to compete at the examinations, or not, as they please; but if they have not passed the Lower Standard, they will be passed over for promotion. There is no need, however, to make any exception in the case of officers who have not yet been confirmed in their appointments or are still probationers in the service, and for such officers the Lieutenant-Governor is now pleased to decide that it shall be compulsory on them to appear at the examinations. The following orders are applicable to their case:—They will not be confirmed in any grade higher than that of the fourth grade of Sub-Deputy Collectors until they have passed the Lower Standard of examination, and they will not be confirmed in any grade higher than the third grade until they have passed the Higher Standard. Their position in these grades will primarly depend on the date on which they are declared to have passed, and their eligibility for substantive *pro tempore* promotion will (other things being equal) be regulated accordingly. If they fail to pass their examinations within the prescribed periods, they will be liable to lose their appointments under the same conditions as now apply to Officiating Deputy Magistrates and Deputy Collectors.

9. All Sub-Deputy Collectors, for whom the examinations are now declared to be optional, will be required to send in their names as intending candidates through their District Officer and Commissioner to the Under-Secretary to Government in the Appointment Department, at least two months before the date which is ordinarily fixed for holding the half-yearly examination. If they neglect to comply with this rule, they will not be allowed to appear. The names of those officers for whom the examination is obligatory will be included in the half-yearly lists of those who are liable to appear at the examination without any further representation on their part.

And if no person within the prescribed period so appears and denies, the Registrar of Mutations shall, if the other provisions of the Act are complied with, record the transfer or succession, the subject of the notice, in the Register of Mutations.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

CALCUTTA, *the 28th May* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 25TH OF MAY 1895.

THE weather during the past week has been unusual because of the very high temperature which has prevailed in the west and centre of the province with but little interruption. Rainfall has been very light and scattered in Orissa, Chota Nagpur, and Bihar, and even in North Bengal there has been considerably less than the average, but fairly heavy falls have been general in East Bengal, Assam, and the eastern half of South-West Bengal.

At the beginning of the week conditions were somewhat unsettled over the Bay, though no definite storm had developed. For some days previous gradients were becoming steeper in the south, and probably a depression, though shallow, existed in the north of the Bay, as readings were very uniform round the coast. If such a depression was there, its influence on the wind circulation was very slight, as the south or south-west winds continued on the Orissa coast, and it was only at Akyab, Chittagong, and Noakhali that directions became northerly. Pressure was steadily falling in Bengal and the north of the Bay, and a rise had commenced in the south-west, being shown by the changes on the Madras coast. This rise spread very rapidly over the Bay. On Monday, the 20th, there was a rapid rise at the Burma stations, and a slow to moderate rise at the other coast stations, while inland there was a slow fall. The effect of these changes was to transfer the steep gradients northwards and to cause a shallow depression to show over Bengal, where readings were a fifth of an inch below the normal. Westerly winds prevailed in the west and centre of the province, and it was owing to this hot westerly wind that temperature rose so rapidly at many stations in Orissa, Chota Nagpur, and South-West Bengal. The rise of pressure continued on the 21st rapidly in Burma and Arakan, and at a diminishing rate towards the north-west. The area of lowest pressure was, therefore, forced westward, and the westerly winds were confined to Orissa and Chota Nagpur. The rainy weather which followed the slight disturbance in the east of the Bay slowly extended northwards, causing the heavy rain in East Bengal and Assam, and in parts of North and South-West Bengal. On Wednesday, the 22nd, there was again a more rapid increase of pressure in the east than in the western districts, and gradients were steep from east to west. This distribution caused strong southerly and easterly winds in all districts except Orissa and Chota Nagpur, where the hot westerly winds continued. Thunderstorms became more general, and led to a large reduction of temperature. On the 23rd mean temperature was below the normal in the greater part of Assam, Bengal, and Bihar, but there was still a large excess in Orissa and Chota Nagpur. The distribution of pressure was then very nearly normal, but there was excess in the east and defect in the west, so that gradients were still steeper than usual. On the 24th thunderstorms were again confined to the eastern districts, but on the 25th they became fairly general, and comparatively cool weather prevailed except in Orissa and Chota Nagpur.

During these last two days a fall of pressure over Bengal and a rise over the Bay caused still steeper gradients in the north of the Bay, and strong winds developed on the Orissa and Bengal Coasts as well as to a considerable distance inland.

Pressure.—During the early part of the week pressure was largely below the normal in Bengal, but the rise which began in the south of the Bay and spread northwards continued from the 21st to the 23rd, after which readings were about ·05 inch above the normal in the east and the same amount below in the western districts. Changes were very slight on the 24th, and there was a brisk fall on the 25th. Means are below the normal at all stations by amounts generally between ·07 inch and ·1 inch.

Temperature—Has been unusually high at times in the central districts, and almost without a break in Orissa and Chota Nagpur. A rapid rise occurred about the beginning of the week in consequence of an inrush of hot westerly winds, which penetrated as far as North Bengal. The highest maximum temperature recorded was 114·4° at Midnapore on the 21st. On the same day the following places had a day temperature between 110° and 113°:—Raniganj, Bankura, Krishnagar, Gaya, Dehri, Arrah, Naya Dumka, Cuttack, Balasore, and Chaibassa. Easterly winds caused a fall on the following day, and local storms led to a still further reduction; so that during the middle and end of the week the difference from the normal was not large except in Chota Nagpur and Orissa, where excess still prevailed. Mean excess in Chota Nagpur is 4°·7, in Orissa and South-West Bengal 4°, in Bihar nearly 3°, and in Assam and North Bengal about 1°·5. In East Bengal, where rainfall has been much more general and constant than in the other districts, there is a small defect.

Rainfall.—Almost general rain has fallen in the Darjeeling and Kuch Bihar districts, and with the exception of the first two days of the week in East Bengal and the adjacent parts of South-West and North Bengal. Showers were common in all districts except the extreme west on Thursday, the 23rd, and again on the 25th, when it extended over North Bihar. The districts where very little rain has fallen during the week are—the Patna, Gaya, Shahabad, and Saran districts of Bihar, and the greater part of Orissa and Chota Nagpur. The average falls are above the normal in East and South-West Bengal, and below in the other districts by ·86 inch in Orissa, ·61 inch in Chota Nagpur, ·52 in North Bengal, and by ·36 inch in Bihar.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 25th of May 1895 :—

NOTIFICATION.

THE following instructions are issued for general information with regard to rule 6 of the Junior Scholarship Rules, which runs as follows:—

"No candidate will be eligible for a scholarship who has not studied for the whole session previous to the examination in the school to which he belongs at the time of presenting himself at the Entrance Examination, unless he has been transferred within that period with the sanction of the Circle Inspector."

(*a*). For the purposes of this rule the 1st February will be taken as the commencement of a High School Session; but in the case of candidates who have failed (or who, having paid their admission fee, have been prevented by sickness or other cause from appearing at the next preceding Entrance Examination, the 1st July will be accepted as the date from which the session begins.

(*b*). The transfer of students from one school to another takes place under the ordinary transfer rules, and the Inspector's sanction is not generally required. But if a student of the first class is transferred without the sanction of the Inspector after the 1st February (or, as the case may be, the 1st July, see preceding clause), he will not be eligible for a scholarship, and if after the 1st September he will be treated by the University as a private student (see Calendar for 1895, page 89, foot-note 1).

(*c*). Application for the Inspector's sanction to such transfer should be forwarded without delay to the Inspector by the parent or guardian of the student, either through the Head Master of the school which he is leaving or directly, in which latter case the Inspector will consult the Head Master. It is open to the Inspector to sanction the transfer of a student, while withholding the right of competing for a junior scholarship at the next examination.

(*d*). If the school to which the transfer is sanctioned by the Inspector is in another circle, a copy of the order of transfer should be furnished by him to the Inspector of that circle.

(*e*). A complete list of all the candidates at the Entrance Examination (and not merely, as heretofore of those who are candidates for junior scholarships) will in future be called for from all recognized high schools. The Head Masters will be required to state against the name of each candidate whether he is eligible or ineligible for a scholarship.

(*f*). The transfer certificates of all candidates who have been admitted into a school after the 1st February next preceding the Entrance Examination should be forwarded with the list of candidates to the Circle Inspector for examination and return. In the case of candidates who failed, or were prevented from appearing, at a previous Entrance Examination, the Registrar's receipts may take the place of the transfer certificates.

Director of Public Instruction.

REVISED ADVERTISEMENT.

A Dictionary of the Economic Products of India.
By DR. GEO. WATT, C.I.E.,
Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Vol. VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G. Vol IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI, (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

Effect of certificate.

9. (*1*) When any arrear of any of the public demands specified in section seven is unpaid by any person liable to pay such public demand to a Government Officer other than a District Collector, or when any such demand as is specified in clause (*f*) of the said section is unpaid by any person liable to pay the same to a Manager appointed by the Court of Wards, such Officer or such Manager may make to the Certificate Officer a requisition in writing in Form No. 3 in the Schedule hereto annexed.

In case of arrears of public demand payable to Officer other than District Collector, such officer may make requisition to District Collector.

(*2*) Every such requisition shall be signed and verified by the Officer or Manager making it in accordance with the provisions of sections fifty-one and fifty-two of the Code of Civil Procedure as to the verification of plaints, and there shall be payable in respect thereof a court-fee of the same amount as is payable under the Court-fees' Act for the time being in force in respect of a plaint for the recovery of a sum of money equal to that stated in such requisition.

Such requisition given by an Officer or a Manager to be verified and stamped as a plaint.

(*3*) On receipt of such requisition, such Certificate Officer, if satisfied that such demand is justly recoverable, may make under his hand and in Form No. 2 in the Schedule hereto annexed, a certificate of the amount of such arrears so remaining unpaid, together with the cost of any court-fee paid in respect of such requisition under sub-section (2) of this section, and shall cause the same to be filed in his office.

The Certificate Officer may on receipt of such requisition make a certificate.

(*4*) The provisions of the last preceding section shall apply to every such certificate.

10. (*1*) When a certificate has been filed in the office of a Certificate Officer under the provisions of sections five, seven, or nine, such Certificate Officer shall issue to the judgment-debtor a copy of such certificate and a notice in Form No. 4 in the Schedule hereto annexed.

When certificate filed, notice to be given to judgment-debtor.

(*2*) From and after the service of such notice, such certificate shall bind all immoveable property of such judgment-debtor situated within the jurisdiction of the District Collector in the same manner and with like effect as if such immoveable property had been attached under the provisions of section two hundred and seventy-four of the Code of Civil Procedure.

Upon service of notice, certificate to bind immoveable property of judgment-debtor.

(*3*) A copy of such certificate may be transmitted by post under the provisions of section two hundred and twenty-three of the Code of Civil Procedure to any other District Collector, for the purpose of being filed in his office, and, as soon as it is so filed, such certificate shall, if the aforesaid notice has been served, bind in like manner all immoveable property of such judgment-debtor situated within the jurisdiction of such last-mentioned District Collector.

Copy of certificate may be sent to another District Collector to be filed; and shall bind immoveable property in such district.

11. (*1*) If in any case the Certificate Officer is satisfied that any person against whom a certificate has been filed under the provisions of sections five, seven or nine is likely to conceal, or remove, or dispose of the whole or any part of his moveable property, and that the realization of the amount of such certificate will in consequence be delayed or obstructed, he may at any time after making such certificate direct, for reasons to be recorded by him, an attachment of the whole or any part of the moveable property of such person.

Certificate Officer satisfied of likelihood of concealment, removal or disposal may attach property.

(*2*) Such attachment shall be made in the manner provided in the Code of Civil Procedure for attaching moveable property, and subject to the provisions of section two hundred and sixty-six of the same Code.

(*3*) Such property may be sold for the purpose of satisfying such certificate, if no petition of objection is filed under the next succeeding section, or if any such petition is filed, then as soon as it has been heard and determined.

12. (*1*) If a judgment-debtor who has been served with a notice under section ten denies his liability to pay the whole or any part of the amount for which such certificate has been made and filed against him, he may at any time within thirty days from service of such notice, or, where no such notice has been duly served, within thirty days from the execution of any process for enforcing such certificate, file a petition of objection denying his liability as aforesaid, before the Certificate Officer by whom such certificate has been made.

Any person served with notice under section ten may file a petition of objection.

(*2*) Such petition shall be in, or as nearly as possible in, Form No. 5 in the Schedule hereto annexed, and shall be signed and verified in the manner prescribed in sections fifty-one and fifty-two of the Code of Civil Procedure.

13. (*1*) The Certificate Officer shall fix a day for hearing any such petition so filed, and upon such day or any subsequent day to which such hearing may be adjourned, shall determine whether such petitioner is liable for the whole or any part of the amount for which such certificate was made, and may set aside or modify or vary the certificate accordingly.

Day to be fixed for hearing such petition. Certificate Officer to determine the liability of the petitioner.

(*2*) Every such Certificate Officer shall, for the purpose of hearing any such petition and determining as aforesaid, exercise all or any of the powers of a Civil Court in respect of summoning, causing the attendance of, and examining witnesses, and in respect of causing the production of documents; and the provisions of the Code of Civil Procedure applicable to these matters shall apply to a Certificate Officer exercising those powers:

Certain provisions of the Code of Civil Procedure to apply to the inquiry.

Provided that if, in the opinion of the Certificate Officer, the petition involves a *bonâ fide* claim of right, he shall refer the petition to the District Collector for orders, and the District Collector, if he is satisfied that a *bonâ fide* claim of right is involved, shall make an order cancelling the certificate.

14. (*1*) The Certificate Officer shall have full power to direct that the costs or any part of the costs of such petition and of the hearing thereof shall be paid by the petitioner, or if his finding is in favour of the petitioner, then by the Secretary of State for India in Council or the Court of Wards, as the case may be.

Certificate Officer may award costs against petitioner.

(*2*) In any case in which a Certificate Officer directs the payment of such costs by any such petitioner, the amount thereof shall be added to the amount entered in the certificate, and shall be recoverable as if the same had been originally entered therein.

Costs how to be realized.

15. The person deemed to be the judgment-debtor under the provisions of section eight may, at any time within six months from the service upon him of notice under section ten, or, if he files a petition of objection under section twelve, from the date of the determination thereof, or, if he appeals under section nineteen from the date of the decision of such appeal, bring a suit in the Civil Court to have the said certificate cancelled or modified:

Judgment-debtor may bring a suit in the Civil Court to contest the certificate.

Provided that no such suit shall be entertained if such judgment-debtor has omitted to state in his petition of objection, if any, the ground upon which he claims to have such certificate cancelled or modified, and cannot satisfy the Civil Court that there was good reason for such omission.

16. When no suit is instituted by the judgment-debtor within the period specified in section thirteen or section fifteen, or if any such suit having been instituted is finally decided against such judgment-debtor, such certificate shall become absolute, and shall have to all intents and purposes the same force and effect as a final decree of a Civil Court.

Certificate when absolute.

FINAL REPORT ON THE OILSEED CROPS OF BENGAL, 1894-95.

THE following is published for general information.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

REVENUE DEPT.,
The 1st June 1895.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final report on the oilseed crops of Bengal, 1894-95.

N. B.—Returns have been received from all districts in these Provinces except Palamau.

1. *Explanatory.*—The oil-seed crops included in this report are:—(1) linseed, (2) rape seed and mustard, (3) the *rabi* or summer variety of *til*, and (4) other oilseeds, *e.g.*, castor-oil, *sorguza* (niger-oilseed), &c. The *bhadoi* variety of *til* has been excluded from this report.

2. *Character of the season.*—The character of the early part of the season, as remarked in the preliminary note on the oil-seed crops of Bengal, 1894-95, issued on the 15th February 1895, was marked by unusually late and heavy rainfall which lasted up to the second week of November, being particularly heavy in Bihar, Chota Nagpur, and North Bengal. From the second week of November practically no rain fell until after the middle of January. During the third week of January, rain fell generally in these provinces, though very scantily in Orissa. In February, the rainfall

was below the normal, except in the Patna Division, and there were no showers in the districts of Eastern Bengal. In March, light rain fell in most districts.

The prolongation of the monsoon rains of 1894, retarded cultivation and somewhat curtailed the usual area sown with oilseeds. The crops were also injuriously affected by the absence of rain from the second week of November to the middle of January, but the light showers which followed in the latter part of January, and in February and March were beneficial. Injury by blight is reported from Shahabad only—and injury by hail from Midnapore and Monghyr only.

3. *Area cultivated.*—The estimates of area sown with oilseed crops as reported in the first forecast, have been modified by the Collectors of Midnapur, 24-Parganas, and Shahabad; and estimates of normal area, this year's area and last year's area which were not supplied in the preliminary forecast for Gaya and for Angul and the Khondmals, have been now given, hence the difference between the areas under oilseeds as now reported and as returned in the preliminary forecast.

The total area in Bengal sown with oilseeds in 1894-95 is estimated at 4,112,100 acres against 4,270,300 acres, estimated as having been sown in the previous year. There is thus a decrease of 3·70 per cent. on the area sown in 1893-94 which is due to the prolongation of the monsoon rains of 1894.

4. *Character of the crops.*—The Collectors of only three districts, viz., Muzaffarpur, Malda, and Angul and the Khondmals estimate the outturn of the different oilseed crops of these provinces at 16 annas; from 20 districts including the North Bihar, Chota Nagpur and most of the districts of the Bhagalpur Division the crops are reported to vary from 12 to 15 annas, and from 20 more districts from 8 to 11 annas; from only two districts viz., Noakhali and Shahabad are the crops reported to be less than 8 annas.

Taking the province as a whole, the outturn of the oilseed crops may be estimated at 12 annas (as is in the preliminary forecast of the 15th February 1895).

The outturn is probably nearly the same as that of the crop of 1893-94, though the area sown was probably not quite so large.

Gross outturn of oilseeds.—In pursuance of the Government of India's order No. 8-53, dated 23rd February 1893, an attempt was made in 1892-93 to prepare estimates of outturn of the oilseed crops in tons for each district separately, but owing to flagrant disagreement of estimate of average outturn returned from neighbouring districts, the attempt proved unsuccessful. In the appended estimate of outturn in tons, (appendix B), six maunds have been taken to be the rate of average outturn per acre of linseed, rapeseed and mustard and 4¼ maunds for other oil-seeds. The gross outturn of the oilseed crop in Bengal, during the year under report according to these estimates, is shown in the abstract statement to amount to 602,600 tons against 609,800 tons, the estimated outturn of the previous year.

BURDWAN ...	Burdwan ...	Linseed	28,200	26,200	26,400	10	10	In the Sadar subdivision, owing to excessive rain during this year, the condition of the crops is worse than it was last year. In the Kalna subdivision, there being sufficient rainfall after the sowing time, the outturn will be the same as in the last year. Owing to seasonable rainfall in sowing time, the outturn in Katwa subdivision will be better than last year.

BURDWAN—*concld.*	Midnapore	Linseed ...	24,300	14,900	14,900	12	12	During the year a larger area was brought under cultivation, but owing to abnormal rainfall in Contai, the outturn has not been so good as was expected. In the Sadar slight damage was done to these crops by hail-stones

	24-Parganas	Linseed ...	1,500	1,300	1,400	8	7½	In the first forecast, this year's area under "other oilseeds" was erroneously shown as 2,000 acres instead of 4,000 acres as shown in the present report. Excessive rainfall at the time of sowing and the want of it afterwards caused the plants to be damaged, although the outturn of this year is a little better than that of last year.

DACCA ...	Dacca	Linseed	12,800	8,900	7,600	10	9	As stated in the first forecast, the area sown this year is less than that of the preceding year, owing to the water not having subsided at the time of sowing; and the outturn was also less on account of heavy rain in November. The difference between this year's outturn shown in this report and in the first forecast is due to the fact that owing to want of rain the outturn was less than what was expected when the first forecast was prepared.

	Mymensingh	Linseed	42,700	35,200	35,200	13	9	Owing to the heavy rains just before and after the sowings, the outturn was less than in the preceding year. The area was also considerably less than the normal on the same account.
		Rapeseed and mustard	479,300	353,300	358,000	14	10½

	Faridpur ...	Linseed	7,000	5,000	5,000	10	10	The outturn has been poor, owing to the total absence of rain during the period of growth of the plants.

	Backergunge	Linseed	30,100	29,800	29,800	11	8	The smaller outturn of all the crops than that reported in the first forecast is due to want of rain.

In the Buxar subdivision, the crops were seriously injured by *kurda* during the year. The linseed crop in the Bhabua subdivision suffered much from the attack of *kurda* since the submission of the first forecast, hence there was a decrease in the outturn of that subdivision.

RESOLUTION.

The following is published for general information in continuation of the Resolution of the Department of Revenue and Agriculture, No. $\frac{7}{3-2}$, dated 7th March 1895 :—

Letter dated 18th April 1895, *from the Secretary, London Exhibitions, Limited.*

Messrs. French and Langdale of the India Tea Growers Association propose making a collective exhibit of specimen teas from the India tea gardens, pressed leaves, and other things of interest connected with the Indian tea industry. In view of this, my Directors consider that if you could see your way, in your official capacity, to issue a letter to the growers in the various tea districts intimating this fact, by this means not only would the knowledge be properly disseminated amongst the people interested, but also the circular emanating from yourself would have great weight. I am emboldened to ask you this as it is the wish of the Company to make the forthcoming Empire of India Exhibition a thoroughly representative one, particularly in that industry which has been so fruitful a source of revenue.

Any packages that may be sent should be distinctly labelled "For the Empire of India Exhibition," and should be addressed to Messrs. French and Langdale, Customs Chambers, 14, Dunstans Hill, London, E.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

CALCUTTA, *the 4th June* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 1ST OF JUNE 1895.

TOWARDS the end of the previous week, after a period of intense heat in the west of the province, unusually steep pressure gradients and strong winds had developed over the north of the Bay. The changes of pressure at the beginning of the present week led to even steeper gradients with the area of lowest pressure well to the west, so that easterly winds became general except in Chota Nagpur and Orissa. Thunderstorms were very numerous on Sunday the 26th, the first day of the week, and heavy rain fell over a large part of the province. A great reduction of temperature resulted over the area affected, but it did not include Orissa and Chota Nagpur, where mean temperature was still between 5° and 12° above the normal.

On the 27th, the following day, a rapid fall of pressure occurred, the change increasing towards the north. This caused a temporary low pressure area over the northern districts, and the winds from being south-easterly at all except the extreme south-western stations became south-westerly in South-West and Central Bengal and the west of Bihar. The rainfall ceased except in Assam and North Bengal, and the hot winds from the west caused a rapid increase of temperature. On the following day changes of pressure were small, but the reaction from the rapid fall of the day before commenced in a slow rise in Assam and North Bengal. Temperature rose steadily, and was largely above the normal in all districts except Assam. The rise of pressure on the 29th was brisk in the northern districts and slow in the south, while over the Bay there was a slow fall, and the distribution was more normal. There was little change otherwise as the excessive heat continued over the whole province. The rise of pressure continued more rapidly on the 30th, especially in the central districts, where it was more than ·15 inch. The resulting distribution was almost normal, and as the area of lowest pressure had now been forced to the south-west, easterly winds became general. Thunderstorms followed, and there was a fall of temperature everywhere. These weather conditions prevailed during the remaining two days of the week. Thunderstorms were fairly frequent, except in Orissa, Chota Nagpur, and South Bihar, and the area of comparatively cool weather slowly extended westwards. On the 31st it included East and North Bengal and North Bihar. On June 1st temperature was below the normal to the east of a line running almost due north through Balasore and Bhagalpur, while to the west excess was more than 5° at Cuttack, Gaya, and Dehri only.

Pressure did not usually differ by more than ·1 inch at the beginning of the week, but excess in the Circars and defect in Chota Nagpur caused much steeper gradients than generally obtain at this time of the year. The rapid fall of the 27th resulted in defect of a fifth of an inch in the north of the province, and this did not give way to any great extent till the rapid rise of the 30th, when the distribution was almost normal. Owing to the rather large defect in the early part of the week, and the small differences from the normal towards the end, means are below the normal everywhere by amounts varying from about ·05 inch in Orissa and Chota Nagpur to nearly ·1 inch in parts of South-West Bengal and Bihar.

Temperature.—At the beginning of the week heat was excessive only in Chota Nagpur, while in East and North Bengal weather was unusually cool. The mean difference from the normal varied from excess of 12° at Ranchi to defect of nearly 9° at Bogra and Sirajganj. Owing to the hot westerly winds on the 27th and 28th, temperature steadily rose, and on the latter of these days there was excess everywhere except in Assam. In Chota Nagpur and the adjacent parts of Orissa, South-West Bengal and Bihar excess varied from 10° to 16° and only at a few eastern stations was it less than 5°. After the wind became easterly and thunderstorms were general, there was a steady fall, and cool weather was again general in the east of the province. Bankura reported a maximum temperature of 116°·1 on the 28th and 29th, and Balasore 116° on the 30th. Raniganj, Midnapore, Chaibassa and Cuttack had day readings of more than 115°, and nearly all stations in South Bihar of more than 110°. Mean temperature is above the normal by 9°·1 in Chota Nagpur, by 5°·7 in Orissa, 4°·5 in South-West Bengal, and by 3°·2 in South-West Bengal. In the other districts it is below the normal.

Rainfall.—Very general showers fell on the first day of the week in all districts except Orissa and Chota Nagpur, where rain has been almost altogether absent throughout the week. Heavy rain has fallen in Assam and East Bengal. North Bengal has received the normal amount, but in the other districts there is a rather large defect. In Orissa the average fall is ·18 inch as compared with a normal fall of 1·03 inches. In Chota Nagpur it is one-seventh of the normal, and in Bihar a third. In South-West Bengal the fall is 1·03 inches, rather more than half an inch less than the normal,

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 1st of June 1895 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; t, thunder; ✓, strong wind.
